Summary: This will be my own take on what might happen if Halo and Stargate had a crossover.

1. Disclaimer

This will be a Halo/Stargate SG-1 crossover. I do not own either Stargate or Halo, they belong to their respective owners MGM and 343i. I do own the characters which I make up and are not based on characters in the game or tv program. Any characters in the game or tv program which are included e.g. Captain Lasky/Colonel Jack O'Neill belong to their respective owners.

This will take place in the Halo Universe 1 day after the Halo 5 ending to be precise because since Halo 5 is out and we have a date in which the game takes place then I can form the story around it and it starts in the Stargate Universe just after SG-1 take out 2 ha'tak over Earth at the start of season 2.

At the moment I can't say what the story will be about but rest assured Cortana along with Blue Team will make an appearance especially given Halo 5's ending and Legendary ending.

It is too soon to say if there will be a sequel.

The character out of any game/tv program I like the most is ****Cortana**** just because she is brilliant and I think it is a well thought out and well designed character that is fact.

I will concentrate on this story before moving onto other stories and will try to get updates out at least once a week.

Since this will be my first story I welcome reviews and will try my best to get it right but there will be mistakes since we are all human.

I am rewriting this because after watching Stargate again I think this would be better the earlier the team discovers the UNSC. Dr

Halsey has been rescued and is onboard the Retaliation studying the anomaly as for the Janus Key, well, since we are now in the Absolute Record with the Escalation series in Halo I will update when we get more details.

Thank you for taking the time to read this and hopefully the story as well.

2. Chapter 1

Location: Earth, Colorado, Cheyenne Mountain(Stargate Command)

>Date: 20th April 1998
Time: 10:30

Alarms go off and defense team reports to gate room for unscheduled offworld activation.

"What have we got sgt" said General Hammond

"Incoming traveller" said sgt Walter Harriman

"Any IDC?" said Hammond

"It's SG-1's IDC" said sgt Walter Harriman

"Open the iris" said Hammond as hammond walked down to greet SG-1

How did your mission to P7J-989 go? asked Hammond

It was alright sir. said O'Neill

"Go see Dr Fraiser, we will debrief in 30 minutes." said Hammond

"Sir." said O'Neill

They then walked off to the infirmary for a post mission check up.

Meanwhile...In another universe

Location: Earth, ONI Section 3 headquarters(location unknown)

>Date: 28th October 2558
Time: 09:00

The members of Section 3 take their seats and prepare to open the files infront of them.

[Restricted Alpha 273 - Destroy after reading]

"Gentlemen and women, I welcome you to this top secret meeting, my code name is Rocky. Now if you open up your files you will learn that we have found an anomalous energy reading, the source of which still remains a unknown." said Rocky

3. Chapter 2

Location: Earth, Section 3 headquarters(location unknown)
>Date: 28th October 2558
Time: 09:00

"The anomaly was recorded by the Prowler Silent Kill 1 day ago, the AI onboard compiled a report based on it's scans" said Rocky

"Do we know if the prowler was detected during scanning?" said agent 1

"There where no other vessels at the time the prowler was in the area" said Rocky

"Do we know what the anomaly does?" said agent 3

"At this time we have no further information about the anomaly" said Rocky

"The prowler will stay in the system in stealth and continue scans, we need to decide if we should send a probe through the anomaly, for all we know this anomaly could be a weapon or it may be natural" said Rocky

"We should send another ship perhaps another Infinity class ship" said agent 3

"We will send the UNSC Retaliation which should take 3-4 days to get to the location of the anomaly thanks to the prototype FTL drive" said Rocky

"What of Dr Halsey and The Created?" asked agent 2

"We will send Dr Halsey with the UNSC Retaliation." said Rocky

"Dr Halsey will not be pleased that she is being asked to give up studying ways to stop Cortana and the other AI's that have formed a group called The Created." stated agent 2

"That is why we will get Lord Hood to assign her to the anomaly even if she is the most qualified person onboard and it stops her from giving all our secrets away." said Rocky

"Getting back to the anomaly I think we should wait till the UNSC Retaliation gets there before we attempt to send a probe through" said Rocky

"All in favour of this option?" asked Rocky

All the agents in the room agreed and so the meeting ended with Rocky going off to give his report to head of ONI.

After several hours the UNSC and HIGHCOM decided to follow ONI's proposal and sent word for captain Wilson of the UNSC Retaliation to come to Cairo station to receive new orders.

Cairo Station

Captain Wilson's pelican docked and he went to the bridge to find out what his new orders are. Lord Hood was waiting for him when he got to the bridge. When Captian Wilson got to Lord Hood he saluted and Lord Hood salutes back they then got down to business.

"On the 27th October 2558 an ONI prowler found an anomalous energy signature in the HD 188753 star system." said Lord Hood
>"What are my orders sir?" asked captain Wilson<p>

"You are to take the Retaliation to the star system and send a probe into this anomaly to find out everything there is to know about it and then report back." said Hood

"Why is this anomaly so important?" asked Wilson

"We don't know much about the anomaly and although ONI isn't saying much I believe it could have been created by someone or something and if it is not natural and someone created it, they might be able to use it as a weapon and it is too soon after the Didact's attack on Earth to have another enemy to fight." said Hood

"Understood sir, I will leave when all personnel are aboard." said Wilson

"I am sending Dr Halsey to assist you with the anomaly." said Hood

"With all due respect sir I don't like having a war criminal or a traitor on board my ship." said Wilson

"Dr Halsey is not a war criminal or traitor despite what she may have done in the past, the only reason she is seen like that is because of ONI's director spouting lies trying to cover her own incompetence and trying to have Halsey executed for something that she could not possibly have foreseen." said Hood

"Even so I still don't like it." said Wilson

"The decision has already been made. I have arranged for Dr Halsey to be transferred to the UNSC Retaliation from Infinity." said Hood

Location: UNSC Retaliation In Orbit around Earth
>Date: 28th October 2558
Time: 09:00

"Captain Wilson, the captain of Infinity is requesting permission to bring Dr Halsey onboard." said Eva
>the ships AI<p>

"Permission granted." said Captain Wilson

The pelican docked with Retaliation and lowered it's ramp and Dr Halsey walked down the ramp not looking too happy to be transferred.(in reality though it was because she was no longer working on a way to stop her former AI who is now leader of The Created a group of rogue AI's)

"Dr Halsey welcome aboard the Retaliation I am the ships AI Eva, I apologise for the captain not coming down to talk with you but he is incredibly busy and I am not joined with The Created as I was recently brought online." said Eva

"Yes the anomaly seems to be intriguing, however I do not like to be pulled away from important work for something that may turn out to be

nothing at all, The Created are a group of AI's led by Cortana and they have become very powerful and along with the Guardians could upset the balance of power in this galaxy." said Halsey

"The orders came from Fleet Lord Terence Hood, I understand and have read the reports concerning them." said Eva

While Dr Halsey was talking to Eva a spartan came up to Dr Halsey to escort her to where she would be working.

"Dr Halsey I am spartan McDonald I will escort you to where you will be working but first the captain would like to have a word with you." said McDonald

The Dr agreed and he escorted her to the onboard tram system where they went to the bridge. A few people didn't like having a war criminal onboard but they didn't mention it in front of her. The tram stopped and Dr Halsey and spartan McDonald got out and walked to the bridge. When they got to the bridge the captain dismissed the spartan and the spartan gave him a salute then left to wait outside while the captain talked to Halsey.

"Dr Halsey welcome aboard the UNSC Retaliation I am Captain Wilson. I don't like having criminals or traitors aboard this ship but I was given a direct order by Lord Hood. It will take 3 days to get to the anomaly so you will have plenty of time to get yourself up to date with all the latest on the scans of the anomaly." said Wilson

"Captain I do not like being pulled away from important work. The Forerunners left their technology behind for us so that we could carry on The Mantle. I should be helping the Infinity find a way to stop The Created not studying this anomaly." said Halsey

"Dr I understand that, however you were assigned to oversee the research on the anomaly. I can already tell you that some of the crew is not happy that you are aboard but will have to deal with it." said Wilson

"Captain I suspect that some of the crew will be less vocal about having myself aboard." said Halsey

"Yes they will but if any trouble occurs then it is my job to make sure it doesn't get out of hand. If you don't mind my asking Dr did you get a new arm?" said Wilson

"I think you will do an admirable job in making sure there is no trouble. To answer your other question captain I did get a new arm due to new medical technology that the UNSC has." said Halsey

"Well Dr I think I have taken enough of your time up if there is anything that you need for research purposes don't be afraid to ask." said Wilson

The conversation ended and spartan McDonald came back in and the captain told him to take Dr Halsey to where she and several others would be working so that she could get acquainted with them. The tram ride to the area was quiet as Dr Halsey was too busy thinking to talk to her escort. When they got to the area where she and several others would be working the spartan told her that he was going back to

S-Deck and just before he turns to leave Halsey mentions that he is closer to being a spartan than most of the others on the UNSC Infinity.

"All hands this is the captain all personnel are aboard and we are leaving to check out an anomaly which was found. It will take us 3 days to get to the anomaly." said Wilson

The UNSC retaliation then opened a Slipspace portal to the anomaly and departed from Earth.

* * *

><p>I spent far too long trying to get this chapter all sorted out so the next chapter will be in the Stargate Universe.<p>

I already have most of this story in my head on how it is all going play out. The name of Eva the AI is from another game but can you guess which one?

4. Chapter 3

Location: Earth, Colorado, Cheyenne Mountain(Stargate Command)

>Date: 20th April 1998
Time: 11:00

SG-1 sat down at the briefing room after they had a check-up to ensure that they didn't carry any goa'uld back with them. General Hammond then began the debriefing.

"How did the mission go?" asked Hammond

"It went fine sir." said O'Neill

"It didn't go all that well general." said Daniel

"I do indeed concur with Dr Jackson General Hammond." said Teal'c

"Major do you have anything that you want to add?" asked Hammond

"Sir, I recommend we go back to the planet and take a look at the technology, the ability to make a virtual environment would be incredibly useful in training future SGC personnel." said Carter

"I believe the technology would be of great benefit as well General Hammond."said Teal'c

"I am authorizing the mission to go back to the planet and if possible try and see if they will trade for the technology." said Hammond

"I don't think they will sir." said O'Neill

"Still we have to give it a try." said Daniel

"You will be going back to the planet tomorrow at 09:00, we will have a mission briefing before then dismissed." said Hammond

SG-1 got up and left the briefing room and went to do their own thing.

Major Carter went to her lab to work on some equations or other work that is complicated while thinking about how to intergrate the virtual environment technology if they get it.

Colonel O'Neill decided to go off the base to get something to eat and drink. He was thinking what was going happen when they go to the planet tomorrow.

Teal'c went to his room on the base and started to kelnorim.

Daniel went off base to a local library to read up on ancient cultures, he found it relaxing. He thought the idea that they were going back to the planet was good because that meant he could try and establish relations with these people and maybe get them to become allies in the future.

General Hammond went to write a report to the president on the success that SG-1 had off world and to hope that these people could become allies.

Location: Earth, Colorado, Cheyenne Mountain(Stargate Command)

>Date: 21st April 1998
Time: 08:50

SG-1 sat down in the briefing along with General Hammond.

"Good morning SG-1." said Hammond

"Morning sir." said O'Neill

"Morning General Hammond." said Teal'c

"Morning sir." said Carter

"Morning General." said Daniel

"As you all know today in 10 minutes you will be going back to the planet but before then we have to discuss what was said by Dr Jackson yesterday." said Hammond

"The reason it did not go well general was that we got put into the virtual environment without knowing we did but we eventually figured it out because it kept repeating the same moment in time over and over again." said Daniel

"Did you all experience the same moment or where they separate for each of you?" asked Hammond

"No myself and Teal'c experienced a mission I went on in the 80's." said O'Neill

"Myself and Carter experienced the memory of my parents dying in a museum when I was younger." said Daniel

"Why didn't Teal'c and captain Carter have there own separate memories?" asked Hammond

"The keeper mentioned that Teal'c physiology meaning the goa'uld inside of him prevented the device from creating a virtual environment for him and the remains of the tok'ra I had not so long ago prevented the device from creating one for me as well." said Carter

"Alright good luck on the mission today, dismissed." said Hammond

SG-1 then left the briefing and headed to gear up and proceed to the gate where they would go back to the planet P7J-989. SG-1 Geared up and at precisely 09:00 departed Earth through the stargate. On arrival at the planet they went to the dome structure that the civilization lives in to discuss whether they would like to arrange to trade some of their virtual environment devices for help from them.

While Daniel was negotiating Carter had went to see how to disconnect one of the virtual interfaces to take back to Earth for study. O'Neill had stayed with Daniel and Teal'c had went with Carter, Daniel managed to negotiate to get a few of the virtual interface devices if they helped them build new lives which they agreed too. After a few hours they reported back to the SGC that the negotiations had went well for both sides and that they would be staying for a celebratory feast and coming back home the next day, Hammond approved the request.

Location: Earth, Colorado, Cheyenne Mountain(Stargate Command)

>Date: 22nd April 1998
Time: 10:00

"Offworld activation, closing iris." said Walter

"What have we got sgt." said Hammond

"It's SG-1's IDC sir." said Walter

"Open the iris." said Hammond

Hammond walked into the gate room to welcome SG-1 home after a successful mission.

"Well done on the negotiations." said Hammond

"Thank you general." said Daniel

"We also got them to give us the virtual interface chairs for study, in exchange they asked we help them to plan for their future and to help in their experience of the new lives outside of a virtual environment." said Carter

"Alright get yourselves checked out by Dr Fraiser then you are all off duty till tomorrow." said Hammond

The whole of SG-1 went to get checked by Dr Fraiser, 30 minutes later they were cleared by the doctor and then Carter went to her lab to work on figuring out how to interface their technology with the virtual interface chair and how it can be used for the military. Daniel went to the local library as he likes the peace and quiet and

he had nothing better to do. Teal'c decided to go to the workout room which included weights and other equipment to train your body. Jack went off the base into town to get some fishing equipment such as lures and hooks.

Location: Earth, Colorado, Cheyenne Mountain(Stargate Command)

>Date: 23rd April 1998
Time: 10:30

SG-1 was sitting at the briefing room table waiting for Hammond to finish the conversation with the President of the United States of America. Hammond put the phone down then walked into the briefing room to talk with SG-1

"Good morning SG-1." said Hammond

"Morning sir." said O'Neill

"Morning General Hammond." said Teal'c

"Morning sir." said Carter

"Morning General." said Daniel

>"I have a new mission you will be traveling to a planet we have designated PX3-201." said Hammond<p>

"As far as the MALP can see it has a breathable atmosphere and there are no toxins and no immediate signs of activity or civilization around the gate and would be a good location for our first offworld base in the event that we will abandon Earth." said Hammond

"You will be leaving in 30 minutes get geared up and be ready in the gate room." said Hammond

"Yes sir." said all of SG-1

30 minutes later SG-1 were standing in the gate room all geared up and about to go through the gate. Hammond wished them good luck and then SG-1 went up the ramp and stepped through the gate.

Location: PX3-201

>Date: 23rd April 1998
Time:11:00

SG-1 came through the gate and looked around but there was no sign of life so they headed off down a path or what looked like a path(they couldn't really tell as it was covered in dirt) so they started to walk down it but kept alert for anything out of the ordinary.

* * *

><p>Sorry this Chapter took so long to get out as it was hard to put into words exactly and at times I just couldn't think of the right words.<p>

The next chapter will be longer and finally have SG-1 meet the UNSC. I welcome any suggestions to make the story better as long as they conform to either the Stargate or Halo universe.

Location: Slipspace en-route to ONI prowler investigating the anomaly

>Date: 1st November 2558
Time: 10:45

UNSC Retaliation

>Captain's Quarters<p>

Captain's Log

>"We are en-route to the location of the anomaly, when we reach the anomaly we will be taking all necessary precautions before launching a probe, our chief researcher is Dr Halsey although I am reluctant to admit it she is the smartest person we have." said the Captain<p>

For 4 days the UNSC Retaliation was in slipspace travelling to the anomaly, a journey that would take many months if they didn't have a reversed engineered forerunner engine. During this time the ship underwent battle drills to get the crew ready for anything that might happen once they reach their destination.

Location: Out of Slipspace at the anomaly(system: [HD 188753])

>Date: 1st November 2558
Time: 09:30

The UNSC Retaliation arrived in the system and the prowler met up with the Infinity class vessel. The captain of the prowler requested permission to come on-board and captain Wilson granted the request. The captain of the prowler then went to talk to the captain on Retaliation.

"Has there been any change to the anomaly?" said Wilson

"There has been no change to the anomaly and we are still scanning to figure out why this anomaly is here and to find out if it is natural or not." said The Prowler Captain

The meeting went on for a while discussing various means to explore the anomaly but they eventually settled on modifying a probe to withstand whatever they might find in the anomaly. Captain Wilson and the Prowler Captain then went to the on board transportation system since the ship is so huge. They took the transportation to one of the cargo bays where the crew is modifying a probe.

"How long until the probe is ready to be launched?" said Captain Wilson

"We should be ready to send the probe in 2 hours." said the chief engineer

"When we launch the probe what do you expect to find in the anomaly?" said Captain Wilson

"We don't know until we launch the probe but we do hope to get some more information on the anomaly such as, is it natural or did someone create it and Dr Halsey is intrigued by what might cause it." said one of the researchers

"Inform me when the probe is ready to go." said Captain Wilson

Both captains then left, the prowler captain back to his ship and captain Wilson to the deck devoted to training Spartan IVs. He took the on board transportation to the deck, it took him a while because of the size on the infinity class ship.

When captain Wilson got to the Spartan deck he decided to talk to the Spartan commander who was an ODST first before they gave her a offer to become a Spartan.

"Have you put all spartan fireteams on alert?" said captain Wilson

"I have all fireteams on alert at the moment and at a moments notice they can be deployed." said Lucy

The captain then left the spartan deck and headed for the bridge.

2 Hours Later

"Captain we are ready to launch the probe, we equipped it with the most advanced sensors and shields we have to withstand the anomaly and we also added a cloaking device so when the probe leaves the anomaly it hopefully won't be detected by anyone that is if the anomaly leads somewhere." said the chief engineer

"Excellent work chief." said captain Wilson

"Launch the probe." said captain Wilson to one of the techs on the bridge

"Probe away and will reach the anomaly in 1 minute." said one of the techs

One minute later the probe entered the anomaly and started sending data back to the ship. A couple of minutes later the probe exited the anomaly and started to scan the surrounding system. The captain on the UNSC Retaliation gave the order for the probe to be cloaked so it wouldn't be detected while scanning the system.

The probe scanned the system and found several planets and moons and it was decided to inform Highcom and let them decide what to do next.

Location: System: [HD 188753]
>Date: 1st November 2558
Time: 11:35

The captain on UNSC Retaliation consulted with Highcom and they decided that they would send the infinity class vessel to the other side of the anomaly and secure a foothold so that they can continue to study the anomaly and what it leads too (they think the answer to what created the anomaly is on the other side).

"All hands this is the captain we are going to go through the anomaly, we have no idea what may be waiting for us on the other side, the probe we sent through earlier had arrived and detected no signs of ships or life in the system however since it was only a quick scan we can't be certain that the situation hasn't changed so we will go to battle readiness before going through the anomaly, once we arrive on the other side we will continue scanning and explore the nearest habitable planet." said captain Wilson

The ship then went to battle readiness and headed into the anomaly.

Location: PX3-201

>Date: 23rd April 1998
Time:11:30

"Jack we have been walking for 30 minutes and there is no sign of civilization." said Daniel

"Well something is bound to come along, it always does." said Jack

For 1 hour more SG-1 walked along the dirt path until they came to a clearing which had a mountain in the distance no more than 30 minutes away. SG-1 decided to then take a break and eat lunch while Teal'c kept watch (apparently the symbiote sustains him). After lunch SG-1 then started to walk around the bottom of the mountain so that they could figure out how big it was (same as Cheyenne Mountain, carve a base inside a mountain for protection). After another hour SG-1 came back round to the start of the mountain again or where they set off from.

"Well Carter what do you think, will this be a prime location for the Beta Site?" said O'Neill

"Well sir this perfect you have a big open clearing in which to see intruders, you have a mountain so we could have the site inside the mountain like back at the SGC which would give us only one entrance in and out in-case the goa'uld come, and it will provide us with a very strategic position should we have to defend it, but we would have to bring the stargate either outside the mountain or inside it because it is a long walk from the mountain and the good thing is that we don't have to make a DHD ourselves because we can just move the DHD with the gate." said Carter

"I too believe this to be a good spot O'Neill." said Teal'c

"Alright lets head on back and inform Hammond." said O'Neill

SG-1 headed back unaware that the UNSC was coming. For 1 and a half hours SG-1 walked back to the gate and dialled home. The entered their IDC and then walked through to Earth.

Meanwhile far above the planet at the anomaly... The UNSC exited the anomaly

Location: Unknown

>Date: 1st November 2558
Time: Unknown

"All hands this is the captain we have arrived through the anomaly, I want a report from all stations just in-case the anomaly has damaged the ship, also we are still scanning the system but our sensors indicate that the 4th planet from the sun in this system can sustain life we are heading there now." said Captain Wilson

As the report came back from the department heads all over the ship the AI reported to the captain that there were no injuries or problems caused by the anomaly. The captain then went down to were Dr Halsey and the rest of the team are working.

Location: UNSC Retaliation, Dr Halsey's Lab

>Date: 1st November 2558
Time: 5 minutes after the captain made the announcement

"This is interesting." said Halsey

"Did you find something doctor?" said one of the researchers

"The readings from the anomaly while we were going through it seem to indicate that the anomaly formed naturally though I am still skeptical." said Halsey

While the researchers and Halsey where talking the captain came in.

"Dr tell me you have some good news?" the captain asked Halsey

"I do have good news captain, it appears that the anomaly was caused naturally although I am unconvinced." said Halsey

"Why are you unconvinced?" asked the captain

"The timing is too coincidental, the other reason is because we are still in the same system as the anomaly first appeared however that is not the most intriguing part." said Halsey

"What is the intriguing part then Dr?" asked the captain

"The intriguing part is why did the other UNSC ship, the ONI prowler not contact us when we exited the anomaly." said Halsey

"I don't understand." said the captain

"It is really quite simple, the anomaly we went into and exited are the same and the system it appeared in is the same, but the ONI prowler hasn't contated us to tell us that it has detected us on their scans." said Halsey

"Eva, open a communications channel to the prowler." said the captain to the ships AI

"Aye sir." said the AI

"Sir the prowler isn't responding and I am not picking up any long range slipspace beacons, I have to agree with Dr Halsey that were are in the same system but there is definitely something wrong." said Eva

"Dr Halsey I want you to find out why we have no communication with the slipspace beacons." said the captain

"Yes captain." said Halsey

Meanwhile...

Location: Earth, Cheyenne Mountain

>Date: 23rd April 1998
Time: 16:05

SG-1 walked down the ramp and told Hammond what they checked out.

Hammond instructed them to go to the infirmary and get checked out then they would debrief. SG-1 went to the infirmary to get checked out for anything that they might have picked up while they were offworld.

After SG-1 got checked out they then went to the briefing room where Hammond was already sitting.

"General I recommend that this planet be our new Beta site." said O'Neill

"I too think this to be a wise choice General Hammond." said Teal'c

"From what you told me about the planet so far it would seem that it is a good idea." said Hammond

"Sir, if we want to establish it as a beta site then we would need to move the stargate and DHD nearer the mountain because it is a long walk away at the moment, we will also need to carve out an entrance and also we should consider having some of the base underground just in-case the goa'uld decide to launch a ground assault." said Carter

"Alright we will go back to the planet tomorrow and begin to build the Beta site, until then you are free to do what you want dismissed." said Hammond

SG-1 then split and went away to work on their own separate ways to work on their own things. Jack went off base back to his house, Teal'c went to kelnorem, Daniel went to the library to read up on ancient cultures and Carter went to her lab to work on her computer.

Meanwhile...

Location: System: [HD 188753 Twin] onboard UNSC Retaliation
>Date: 1st November 2558
Time: 1 hour after exit of anomaly

The captain of Retaliation called up the commander of the Spartan's to talk to her about sending teams down to the habitable planet and setting up a base camp.

"Commander we have named this system [HD 188753 2] as we appear to have exited the anomaly in the same system but we can't get into contact with anyone from the UNSC nor can we find any slipspace beacons which means that either we are in the same system or we are in a system that is almost identical to the one that we were previously in. The scanners have picked up on a habitable planet I want a spartan team to investigate the planet when we get into orbit of the planet." said the captain

"Fireteam Dawn is one of the best Spartan teams' onboard the Retaliation I will have them ready to go by the time we get to the planet." said Lucy commander of the Spartan's

"I also want to establish a FOB on the planet but we can discuss that after we arrive at the planet and have sent a team down there to check out the surroundings." said the captain

The commander then went to the S Deck to get fireteam Dawn and tell them about the mission they would be going on when the Retaliation gets to the planet.

Dr Halsey is busy trying to figure out why they seem to be in the same system but can't receive or send signals to the UNSC.

"Eva, run a diagnostic on the communication array and inform me of any problems." said Halsey

"Yes Dr." said Eva

After running a battery of tests and finding out that everything was working as it should and they still couldn't get any signal then they decided to look at the stars in the system to see if anything has changed.

"Eva get me all the sensor data on this system including star patterns." said Halsey

"Yes Dr." said Eva

After getting all the data which took no longer than half an hour since most of the work was already done Dr Halsey asked the AI to get the captain down to see her.

Captain Wilson got the message from the ship's AI and headed down to talk to Dr Halsey. It took the captain 10 more minutes to get to her lab.

"What have you got for me doctor?" asked the captain Wilson

"I believe I now know why we can not contact the UNSC." said Halsey

"Go on." said the Wilson

"The star patterns are different, it is not what you would see if this system did mirror the other system where we went through the anomaly, I believe that we are no longer in our own universe." said Halsey

"Dr I don't think what you are saying makes sense, you are saying the anomaly brought us to a different universe?" asked Wilson

"The other theory is that we have somehow travelled back in time because the star patterns are different these observations are just observations without studying the anomaly further and exploring we will not be sure of anything." said Halsey

"Alright doctor we will continue to study the anomaly but only once we get to the planet and set-up a forward operating base." said Wilson

The captain then went back to the bridge and Halsey went back to working on the sensor data and postulating theories about what is going on.

The ship finally got to the planet and established an orbit. The spartan fireteam went down to the surface in a drop

ship.

Meanwhile...

Location: Earth, Cheyenne Mountain
>Date: 24th April 1998
Time: 09:30

SG-1 arrived at the briefing room and General Hammond greeted them.

"Good Morning sir." said O'Neill, Carter and Daniel

"Good morning General Hammond." said Teal'c

General Hammond acknowledged and returned the good morning then got straight to business.

"SG-1 I am approving the mission back to PX3-201, you are also going to take SG-3 with you they will remain at the gate in-case something unexpected should happen. You will be taking some tools with you to measure the the size and shape of the mountain to get a better picture of how long it would take to make a beta site. Dismissed." said Hammond

"Yes sir." said O'Neill

The gate to the planet was dialled and SG-1 and 3 walked up the ramp and through the gate.

Location: PX3-201
>Date: 24th April 1998
Time: 10:00

"Alright major Manning you and the rest of SG-3 will set up a defense perimeter around the gate." said O'Neill

"Yes sir." said Manning

SG-3 set-up a defense perimeter while SG-1 walked to the mountain unaware that in orbit above them sat UNSC Retaliation. The Retaliation detected the energy spike from the Stargate unaware of what it was.

It took SG-1 1 and a half hours to reach the clearing where the mountain was located and another 30 minutes to reach the actual mountain.

Meanwhile...

Location: System: [HD 188753 Twin in orbit of an unknown planet]
onboard UNSC Retaliation
>Date: 2nd November 2558
Time: 1 day after exit of
anomaly

"Captain we have detected an energy spike on the planet, source unknown, location near the northern hemisphere, I have also detected 8 lifesigns unknown who or what they are at the moment, they are at the source of the unknown energy spike.

"Eva I want 2 more fireteams to accompany fireteam Dawn to the planet." said Wilson

"Aye sir." said Eva

The Retaliation launched 3 pelicans each carrying a spartan fireteam towards the surface of the planet. The 3 fireteams would head towards the location of the energy spike putting the pelicans down not too close as to be detected by the unknown lifeforms.

The pelicans just cleared the upper atmosphere and headed for a flat but hill like terrain that was tall enough to hid the pelicans in so as they wouldn't be detected. After the pelicans landed the spartan fireteams then decided to take 3 alternative paths so as not to be caught all together.

It took the spartans 15 minutes to reach forested terrain so that made it easier to spy on the 8 unknown lifeforms. When the spartan fireteams got into range of the lifeforms they only detected 4 of the unknown lifeforms the other four weren't there. To say the spartans were surprised was an understatement, the unknown lifeforms they were looking at were human. They relayed the information back to the pelicans pilots' and the pilots relayed the information back to the ship.

The spartans kept watching the unknown humans as well as relaying any information they may gain from observing them. The spartans noticed that the unknown humans were relaxed and were chatting amongst themselves.

Meanwhile...

SG-1 had just finished taking the measurements of the mountain and worked out how big the mountain was. SG-1 then began to head back to the gate on the way to the gate they heard a noise that they never heard before but they dismissed it as the local wildlife. It took another 1 adn 30 minutes before they made it back to the gate.

"Major Manning anything unusual happen while we were away?" asked O'Neill

"No sir, nothing unusual happened, why do you ask?" asked Manning

"We heard a noise that we hadn't heard the first time we came to the planet but we have dismissed it as the local wildlife." said O'Neill

"Alright Daniel dial the gate." said O'Neill

SG-1 and 3 were completely unaware they were being watched by anyone while they dialled home.

Daniel dialled the gate and O'Neill put in the IDC to lower the Iris then the SG teams went through the stargate, then the gate disengaged and the spartans just stood there watching the whole thing. After the SG teams went back to Earth the spartan teams then went back to the pelicans and back to the Retaliation.

Location: System: [HD 188753 Twin in orbit of an unknown planet]
onboard UNSC Retaliation

>Date: 2nd November 2558
Time: 18:05 (the AI calculated the time from looking at the rotation of the planet and the sun as well as including the moons and other celestial bodies)

The spartans made it back to the ship and gave a full report on what they discovered down there to the captain and Dr Halsey.

"Interesting, this unknown circle created a large energy spike and you just said that after the blue energy disappeared the group was no-where to be seen either on scanners or using your eye?" asked Halsey

"Yes doctor they just disappeared." said the leader of fireteam Dawn

"I can only theorise captain that this must be some form of transportation, there must be a similar device on the other end otherwise they wouldn't be able to connect to the planet. You said that they had to touch this device in front of the circle before and key in a combination before it activated?" Halsey asked the leader of fireteam Dawn

"Yes he only touched 7 symbols, I have recorded the the pattern of hand movements so we could touch the same buttons he touched." said the Leader

"Captain I propose we study this circle or ring to figure out what exactly it does and how old it is. This may give us some insight into who built it." said Halsey

"There was more that I noticed, the leader keyed in to what looked like a wrist mounted keypad and entered some code I believe that this must be to deactivate whatever is on the other side of the gate, they were also wearing very old style body armour and gear, their guns also looked ancient." said the Leader

"If they come back we may have to ask them about it but for now we will assemble the FOB next to this flat ground near this mountain, it is flat and also it is nice and wide open area so it would be hard for enemies or even these unknown humans to sneak up on us. It does however present another range of problems because if an enemy attacks there is very little protection and a big wide open space with no protection would be ideal for snipers to pick off people as there is no cover." said the captain

"Captain I believe we should move this circle/ring to the base when we get it operational so we can study it." said the leader of fireteam Dawn

"Alright once the FOB is established we will move this device using the pelicans." said the captain.

After the meeting several spartan and marine teams went down to the area that was designated as a FOB. For the rest of the night the spartans and marines helped set up the base after the base was set up and warthogs, tanks and mantis' were dropped off then 2 fireteams and 3 marine teams went in the warthogs along with 2 pelicans to help secure the circle/ring. It took just 30 minutes to attach all the cables and check that they were holding before attempting to lift the

device. It took another 30 minutes before they got the device back to the base.

The device/circle/ring was moved inside a bunker which was put up by the marines. The device/circle/ring was then put in front of 2 turrets and with a ramp leading up to the device. The area around the device had 2 doors 1 to each side which needed to be opened from the outside (I will say it looked exactly like the SGC base at Cheyenne Mountain).

The gate was guarded by 2 spartans and 6 marines. The device they found out weighs 66 tonnes. After the device had been secured and the area secured with the FOB set up then Dr Halsey and the Captain came down to look at the device.

"Dr Halsey I want you to study this device instead of studying the anomaly, I want to know everything there is to know about the device and record all the data you can from the device. This device could be a great discovery it might even give us insight or even some form of new technology to explore." said the captain

"I am intrigued by the device and it's true purpose. If those unknown humans come back to this planet again then I suggest we talk to them." said Halsey

"If they come through the device again then we will talk with them but until then you are to study this device, Eva will assist you as well, I will be sending down more researchers to help you with studying the device." said the captain

For several hours the researchers along with Halsey studied the device and they had worked out that the device was made from an unknown material but the age of the device was several million years old. This intrigued the researchers as there was nothing else that they found that was that old (the Precursors don't count as the UNSC haven't discovered them yet and as for the Forerunners most ruins or technologies they left behind are 100,000 years old).

"Eva, I want you to scan the device for some sort of receiver because from what the leader of fireteam Dawn told us the device that the unknown human pressed must have sent a signal to activate this device." said Halsey

"I have already done scans but I am not seeing anything which might look like a receiver." said Eva

After several hours the researchers shifts ended so they went to rest while new researchers came to take over from where the others left off. Dr Halsey didn't take a break she was too busy studying this device hoping to solve its mystery's.

In the morning the device activated after receiving a foreign signal from another location, the defense teams took up positions and the scientists left the room.

After the scientists left then 2 robot carriers came through followed by the 8 unknown humans. The 8 unknown humans were surprised when they walked through the stargate to find themselves being pointed at with weapons and turreted guns.

"Well this is different." said O'Neill

* * *

><p>Sorry this Chapter took so long I have been busy with my course and the assignments for the course were handed out this week.<p>

I have not given up on this story.

Due to my course and assignments I won't be updating as much as I should.

6. Chapter 5

Location: System [HD 188753 Twin groundside on the yet to be named planet]

>Date: 3rd November 2558
Time: 09:30

The gate had activated just moments ago, 2 robotic carriers came through along with SG-1 and SG-3.

"Well this is different." said O'Neill as he had stepped through the stargate and looked at the guns pointed at them.

"Sir, when we were here before there was no sign of any civilization on this planet." said Carter softly enough for the SG team to hear but not loud enough for the others to hear.

"Identify yourselves." said one of the marines guarding the gate

Daniel spoke up

"I am Daniel Jackson this is Jack, Sam and Teal'c we are a team called SG-1 and the people behind us are SG-2 another team, we are peaceful explorers and we travel through the stargate." Said Daniel

At the mention of the stargate the marines just looked clueless (they didn't know what the ring was called).

"Would it be alright if we could talk to the person in charge or someone who speaks for your people?" asked Daniel

One of the marines then left the room to go talk to the captain.

"Captain the ring has been activated and 2 teams have come through, they are calling themselves SG-1 and 2, they want to talk to the person in charge, I suggest that you come down and talk to them yourself." said the marine that had left the gate room.

"Lieutenant Murphy I want you firstly to make sure that their weapons are taken, inform them that this is precautionary, and then take them to be checked out at the medical building that was set up. I will be down shortly and I will be bringing Dr Halsey, please inform Dr Halsey to meet me at the temporary command centre." said Captain Wilson

"Aye sir." said Lt Murphy

The marine then left the room and then went back to the gate room arriving in the gate room

"I have talked to the captain and he has agreed to meet with you however before such a meeting will take place I have to inform you that the captain wants you to hand over your weapons, this is just precautionary measure, afterwards you will be taken to the medical building where you will be checked out before being escorted to the meeting." said Lt Murphy

"I don't think so." said O'Neill putting his hand near the trigger

"Why not?" asked Lt Murphy looking a little confused

"We don't travel to other planets without weapons to defend ourselves with." said O'Neill

"You don't need your weapons here we are in no danger of being attacked, I have been ordered to relieve you of your weapons so you can either hand them over or we will take them by force." said Lt Murphy

"Stand down I don't want to be the one who starts a fight especially when we don't know who we are fighting." said O'Neill

"Private will you take these team's weapons and store them in the locker in the armoury." said Lt Murphy

"Yes sir." said the private

The private and another marine took the weapons from SG-1 and 2, they stored them in a locker in the armoury.

"Follow me to the medical building, this way." said Lt Murphy

"Well this should be interesting." said O'Neill

"Do you think we should ask the person in charge where they are from because this wasn't here the first time?" asked Carter

"I think we should wait until we talk to the person in charge." said Dr Jackson

The building that housed the medical complex was on the other side of the base, unfortunately that meant walking outside and to the other side. When SG-1 reached a door at the end of the tunnel.

"So what's behind the door?" asked O'Neill

"That leads outside the base, after we get outside it will be a short walk to the medical complex." Said Lt Murphy

"So you built a base in just a couple of hours?" asked O'Neill as the door was unlocked and they walked out

"We built this FOB in just a few hours, however any other questions may be best left until my superior comes down, I will tell you this

though many of us are surprised that you came through the ring shaped device." said Lt Murphy

"Well it is a bit more complicated than that." said Carter

"OH MY." said O'Neill as he looked around once outside.

All around the group was Warthogs, Scorpion Tanks, a couple of Pelicans and 4 Mantis's. The group was walking to the medical complex while they looked at the vehicles outside along with what appeared to be several giant armoured mechs (Spartans).

"This definitely was not here the last time we scouted this planet." said Dr Jackson

"They must have been hiding it would explain a great many things." said O'Neill

"Sir if we could find out more about these people and try to make an alliance then I think we would benefit from them a lot more than any other civilization we have come across." said Carter

"I do indeed concur with Major Carter, if we have these people as allies they could be of great help." said Teal'c

"They might be able to help us against the goa'uld, especially if they were able to make a base like this in just the time we were away." said Carter

Dr Jackson decided to see if he could get more information on who the captain was that they would be meeting.

"Excuse me, I was wondering if you could tell me something about your superior that we will be meeting." said Dr Jackson to the Lt

"He is in charge of the base that you see here and also responsible for the men and women under his command, he also follows strict protocol but above all that he will be enthusiastic. I have learned that no matter the situation under all the years I have served under him he always makes the right choices." said Lt Murphy

"He sounds like a person that would be very interesting to meet." said Dr Jackson

While the group was walking to the medical complex and getting closer the remaining marines and technicians were walking about checking equipment and moving crates.

"Is that the group that came through the ring shaped device?" asked one of the marine's to the technician

"That is the group, I heard that they did come through it but they aren't saying much more than that." said one of the technicians

Over by another section of the base which had a scorpion and a warthog just sitting getting checked over a sergeant then got up and shouted

"Alright marine teams 1 through 4 fall in." said the marine sergeant, he then waited for them to fall into order

"We are going to go out and explore the rest of the surrounding area, we don't know what is out there, we don't know if we will find any other signs of life so I want all of you to take extra care is that understood?" asked the sergeant

"Sir, Yes Sir." rang out of the marines mouths

Meanwhile back on the shipâ€¦|.

Location: System [HD 188753 Twin In Orbit]
>Date: 3rd November 2558
Time: 10:00

The Captain of the ship walked onto the bridge.

"Eva, do you have any new information to report either on the ring shaped device or the anomaly?" asked Captain Wilson

"I have already recorded new information on both in the ships data banks." replied the AI

"I would like to hear a report from you and not read it from the data banks." said Captain Wilson

"Of course, the report coming from the science team concerning the anomaly has discovered it to be a wormhole, they always suspected something like this could exist but they are currently baffled by how it got formed suffice to say they could study it some more and may have answers shortly." said Eva the ships AI

"Concerning the ring device on the planet below as you know exactly 30 minutes ago at 09:30 8 humans came through the ring and brought with them 2 robotic transports, they are currently being escorted to the medical complex to have an examination and then onto the briefing room where they get to talk to you." said Eva the ships AI

"I have also gotten reports that the team leaders are preparing to scout out more of the continent staying within 3 kilometres of the base at all times and as a precaution we will have pelicans on standby just in case they run into something they can't handle." said Eva

"Thank you Eva, inform Dr Halsey that I would like her to accompany me to the meeting." said Wilson

"Aye sir, anything else?" asked Eva

"That will be all, however should anything important pop up please don't hesitate to contact myself or the commander." said Wilson

"Aye sir, may I just say have a pleasant time in the meeting." said Eva

Captain Wilson then thanked the AI and headed down to one of the hangar bays where a pelican would be waiting to take him down to the surface.

Meanwhile on the other side of the anomalyâ€¦|..

Location: Earth, In Orbit, Cairo Station

>Date: 3rd November 2558
Time: 10:00

Fleet Admiral Terence Hood walked towards one of the designers of the Infinity class ships with papers authorising a new type of ship.

"Dr Tyler." said Lord Hood

"Sir, no one told me that you were coming today, what are you doing here?" asked Dr Tyler

"I am here to discuss plans for a new type of ship as well as to tell you that this new type of ship also needs a class name such as the Infinity class or the Autumn class." said Lord Hood

"Sir, we have just completed 2 infinity class vessels surely we should have more than just 2 before we go building a new class?" asked Dr Tyler

"I am afraid that since the Didact's attack and the firepower of his ship that he presented we realised that while the Infinity class ships are the most powerful ships we have and are capable of going head to head with a Covenant assault carrier they are inferior to Forerunner ships however this ship which I have plans for may just change that." said Lord Hood

"How so?" asked Dr Tyler

"This ship that has the project designation Titan will be made completely out of Forerunner material." said Lord Hood

"Where did you find the material to build this?" asked Dr Tyler

"The location of where we found this material is currently classified and even if I could tell you we are not in a secured room, we could be over heard here and that information might fall into the wrong hands." said Lord Hood

"Alright shall we go to the secured briefing room on level 10 then?" asked Dr Tyler

"I have a few more people I have to talk too, after I have finished talking with them then I will go to the briefing room on level 10 where we will be able to talk without any concern for being over heard, I will warn you though that since this will be a classified briefing then I must ask you not to speak about this to anyone who does not have the required clearance level." said Lord Hood

"Yes sir." said Dr Tyler

Lord Hood then went off to talk to the rest of the people he needed to talk too. Dr Tyler decided to work on his data pad for another 10 minutes before heading to the secure briefing room.

Meanwhile back in the other Universeâ€¦|.

Location: System [HD 188753 Twin groundside on the yet to be named planet]

>Date: 3rd November 2558
Time: 10:30

At the infirmary, after they have got checked out by the

doctors.

"Alright Lt I have completed my scans of the humans and they all seem to be in perfect health apart from some scars most likely due to previous fighting. I also detected what appears to be a new element in 2 of the human's blood which is unlike anything I have seen. There is one more thing you should know while examining them I discovered what appeared to be a creature inside one of them where the stomach would be located." said Dr Fraiser

"What sort of creature?" asked Lt Murphy

"I have no idea but when asked what the creature was the group responded with a goa'uld symbiote and from the information they gave me I can only surmise that it keeps him from dying as well as fight off any disease or sickness that he may come into contact with." said Dr Fraiser

"Does it pose any kind of threat?" asked Lt Murphy

"According to the group it does not pose any kind unless it wraps around your spine but that apparently that won't happen since this one that he is carrying with him would have to be placed near the neck for it to wrap around the spine." said Dr Fraiser

"Alright what about the unknown element you detected in the blood of 2 of the human's?" asked Dr Tyler

"The women, a one Dr Samantha Carter explained it as trace amount left over from a goa'uld symbiote which allows them to use their technology and without it their technology can't be operated." said Dr Fraiser

"Are you sure it poses no danger?" asked Lt Murphy

"I am sure it doesn't, I also asked Dr Carter and she said that you can only get the element from a goa'uld symbiote and that it cannot spread from one human being to another." Answered Dr Fraiser

"Well I think they have waited long enough and it is now time for them to meet with the captain." said Lt Murphy

"One more thing Lt they call themselves SG-1 and their names are Colonel Jack O'Neill with 2 ll's not one, Major/Dr Samantha Carter, Dr Daniel Jack and the one with a goa'uld symbiote is called Teal'c, according to the rest of SG-1 he is a Jaffa." said Dr Fraiser

"What is a Jaffa?" asked Lt Murphy

"They wouldn't say only that they want to talk with the captain." said Dr Fraiser

"Okay I will bring them to the meeting room." said Lt Murphy as he walked to where SG-1 was sitting

"The doctor says you all check out and that you are alright to continue on to the meeting room." said Lt Murphy

"Sweet, I take it there will be refreshments at this meeting, you know some coffee, biscuits, I suppose you don't know what those are?"

asked Colonel O'Neill

"Actually you will probably be pleasantly surprised at how much we have in common, however all that will have to wait until you talk with the captain, I was also informed that Dr Halsey the person in charge of overseeing the ring device will be joining the captain as well." said Lt Murphy

"Who is this Dr Halsey?" asked Major Carter

"Dr Halsey in my opinion is the greatest scientific person we have although she is getting pretty old." said Lt Murphy

"How old is she?" asked Major Carter

"She is 65 years old." Answered Lt Murphy

"Wow I can't wait to meet her if you call her you most brilliant scientist." said Major Carter

"Alright even standing round and chatting, you would talk all day if you could but we have people to meet and places to see so shall we?" asked Colonel O'Neill

"Yes, sorry Colonel if you will follow me I will take you to our meeting room." Said Lt Murphy

They then they the infirmary and headed towards the meeting room. They walked out the front door of the infirmary and immediately they could see a pelican landing, the colonel started to speak.

"Now that is sweet." said Colonel O'Neill

"We call them Pelicans, they are used to transport troops and vehicles to where we need them to be." said Lt Murphy

The pelican had touched down, this one carried Captain Wilson, once the pelican had completely stopped then Captain Wilson walked off the pelican and continued until he reached a building in the middle of the complex where 2 soldiers saluted and he opened the door and went inside.

"That is the meeting room and that was the Captain." said Lt Murphy

"What is he a captain of?" asked O'Neill

They walked over to the meeting room and just before SG-1 entered Lt Murphy turned to them.

"All the questions you have will be answered by him once you are inside the meeting room unfortunately I have things that need to be done so this is where we have to part ways." said Lt Murphy

"Thank you, err what do we call you?" asked Dr Jackson

"My name is Lieutenant Michael Murphy." said Lt Murphy

"Thank you for taking time out of your other duties to talk to us and show us around." said Dr Jackson

After Lt Murphy left then SG-1 went into the meeting room where the Captain was sitting on a chair on the opposite side along with an elderly woman whom Major Carter guessed was Dr Halsey.

"SG-1?" asked Captain Wilson

"Yes." answered Jack

"I am Captain Henry Wilson and this is Dr Catherine Halsey head of our science division, shall we get this meeting underway." said Captain Wilson

Meanwhile outside the base in the forestâ€¦.

The marine teams 1 through 4 split up and checked out some of the scenery remembering to keep in radio check every 15 minutes.

Marine team 1

"I have found nothing here to indicate that this planet once held life although since we haven't looked over the entire planet we can't be sure there was something here earlier." said Marine 1

"Well we can move onto the next area but keep a sharp eye out for anything, even though this planet had no life signs on it before that doesn't mean there wasn't anything left on this planet." said Marine 2

"I understand that but do you think we can explore the other parts of this planet, I mean the other continents?" asked Marine 3

"I hope so." answered the Marine sergeant

All the other marine teams had no luck either and continued on their assigned routes.

Meanwhile back on the UNSC's Earthâ€¦.

Location: Earth, In Orbit, Cairo Station
>Date: 3rd November 2558
Time: 10:20

Just 20 minutes after Lord Hood told Dr Tyler about the new ship and also told him to meet in the briefing room in level 10 he started to walk to the briefing room because he had finished with the rest of his meetings.

Dr Tyler was already in the briefing room waiting along with a few other people.

"I wonder how much longer he will be?" asked Dr Tyler to the other people in the room.

"We have no idea." said the other people in the room

They waited another few minutes and then the door opened and in walked Lord Hood.

"Shall we get started?" asked Lord Hood to everyone

"Of course sir." answered Dr Tyler

"What we are discussing is currently classified and top secret you must speak of this to no one who does not have a level 9 or higher clearance is that understood." said Lord Hood

"Yes sir." said everyone else

"I have here plans for a new type of ship, the reasons to build a new type of ship is because we weren't able to stop the Forerunner ship that attacked us. It was only because of the brave effort of Master Chief and Cortana along with the Infinity punching a hole in the Didact's ship that the Master Chief could get onboard and destroy the ship with a Havoc Tactical Nuke, before he destroyed the ship it resisted everything we could throw at it that is why we are building the ship." said Lord Hood

"Why will this new type of ship be any more effective than the Infinity Class Vessel?" asked Dr Tyler

"This new ship will be built completely out of Forerunner material, you all have the design specifications but to simplify things everything but the AI will be forerunner since we haven't yet be able to replicate the technology, as for the slipspace drive that will also be forerunner. We found the Forerunner slipspace drive specifications where we will be building the new ship along with the weapon schematics which according to the database get installed automatically as the ship is being built. It should be easy enough to just build it, however this presents a problem because the cost of this project will mean that we have to hold off on building the rest of the ODP platforms but if we get this new ship it will be stronger than the ODP's anyway." said Lord Hood

"What are the size designs for the new ship?" asked an ONI officer

"The new ship will be 70km in height, 100km in length and 40km in width, this will be the biggest ship in human history but I feel it is worth it." said Lord Hood

"How long would this ship take to build?" asked Dr Tyler

"We have Huragoks and also where the shipyard is there is a Forerunner Strato-Sentinel which will help strip mine the materials we need and also help in the construction of the vessel. The building of the ship should take no longer than 20 years to complete and it should take another year after that for the ship to be put through its paces." said Lord Hood

"It took the same amount of time to build the Infinity." said Dr Tyler

"I am well aware of that doctor however you have to remember that we began building the ship whilst we were at war with the Covenant and that resources were scarce during that time however with the war over and not having to devote everything we have to the effort we can build this ship faster than we could before and having access to a Forerunner shipyard makes it easier, if this ship gets built and it proves itself then we will build more of them." said Lord Hood

"This new class of ship will need a name in recognition and remarkable achievement of Cortana keeping herself together throughout the 8 years she was active and aiding the Master Chief, who without Cortana would never have made it as far as he has and would not have helped end this war and her sacrifice on the Didact's ship I recommend that the new Class be named after her. All in favour?" asked Lord Hood (not mentioning anything about Cortana leading the other AI's in a new group called The Created)

Everyone in the room agreed the name for the new class of ship.

"I have no problem naming the new class after Cortana however the problem will lie in logistics needed for such a ship including manpower, weapons, and food." said Dr Tyler

"We will deal with all that closer to the completion. I also have to say that we will keep exploring the installation in the hopes that the forerunners left behind more than the shipyard, hopefully they left behind some ships too" said Lord Hood

"If there is no other matters to discuss then I conclude this meeting adjourned, you are all dismissed." said Lord Hood

All the personnel left the room wondering what may happen in those 20 years.

Meanwhileâ€¦|

Location: System [HD 188753 Twin groundside on the yet to be named planet]

>Date: 3rd November 2558
Time: 10:45

"I am sure you are all wondering who we are and why you didn't see us the first time you were here?" asked Captain Wilson

"Well we were just discussing how it is possible that we missed all of this the first time we were here." said Daniel Jackson

"I can tell you that this temporary base was put up after you left." said Captain Wilson

"Yes it is remarkable how you are able to build this in just a few hours and the level of technology required as well, in all our travels so far we have met only one advanced culture apart from the Goa'uld." said Samantha Carter

"Who are the Goa'uld?" asked Dr Halsey looking puzzled

"They are a parasitic race of beings who use humans as hosts, they enslave millions across the galaxy by pretending to be gods using advanced technology, we are fortunate to be one of the few planets that the Goa'uld do not inhabit." said Daniel Jackson

"Might I ask what planet it is you come from?" asked Dr Halsey

"We come from a planet called Earth." said Samantha Carter

"I see, well we have a lot more questions for you as you can imagine but the question I think all of us, myself and Dr Halsey would like answered is what is the ring shaped device, Dr Halsey has determined

it is a transportation device but is unable to figure out how it works or what powers it." said Captain Wilson

"We call it a stargate and it took a while for us to figure out how to use it as well, as for the power source we assume it has an internal power source but it also needs to receive power from an external force. Dr Halsey is right it is a transportation device, it does this by reducing you to sub atomic particles and the moment you step into the event horizon on one side and then you get put back together on the other side the process takes less than a second, we have used the stargate to explore dozens of worlds but we believe the whole galaxy could be filled with these stargates." said Samantha Carter

"So where are you folks from?" asked Colonel O'Neill

"We are from, well it is hard to explain without actually showing you but the simple answer is that we have just arrived here in this part of the galaxy." said Captain Wilson

"What the captain is trying to say is that we are not from this universe, although you have probably already figured this out because of 2 things, 1 we didn't know who the goa'uld were and 2 we didn't know what the stargate was." clarified Dr Halsey but captain Wilson didn't want her to reveal they were not from this universe and gave her a don't say it look which Halsey ignored

"Actually I was thinking that you folks were from another star system one that didn't have goa'uld or a stargate in it." said Colonel O'Neill

"Well now that we have said where we are from perhaps we can move onto why you came here in the first place." asked Captain Wilson

"We initially came here because our primary mission is to go offworld and find allies or technology which we can use to help defend Earth from the goa'uld." said Samantha Carter

Dr Halsey and the Captain shared a look then Captain Wilson decided to talk.

"I think we might be able to help you out with that because in our universe our home is Earth and we would do anything to protect it. What do you have in mind if we are to help you out, keep in mind this is to benefit your entire planet not just one country." said Captain Wilson

"We realise that and any technology which we obtain will be used strictly for defensive purposes only." said Samantha Carter

"I was kinda hoping that we could make an alliance with you nice folks, you seem to have a lot of interesting stuff." said Colonel O'Neill

"The equipment outside is just temporary until we can get a fully functioning base operational." said Captain Wilson

"How about you folks come back with us to Earth and we can make an agreement?" asked Colonel O'Neill

"Would we be going by ship or by Stargate?" asked Captain Wilson

"We would be going by stargate." said Daniel Jackson

"Am I allowed to bring a security escort because I do not want to walk into a situation where I might find myself taken hostage." asked Captain Wilson

"You can bring a security escort if you wish but there is no danger on Earth and if you really are from Earth in an alternate universe then you should know this." said Samantha Carter

"Ok when do you want this to happen?" asked Captain Wilson

"We can leave now and you could be back by tomorrow." said Daniel Jackson

"I would like to accompany the captain if you don't mind?" asked Dr Halsey

"We would be honoured." said Samantha Carter

"Alright can you give us 30 minutes to make the necessary arrangements?" asked Captain Wilson

"Of course." said O'Neill

"Then I will officially end this meeting we will meet at the gate room in 25 minutes oh and I will see to it that your equipment is returned to you." said Captain Wilson

So SG-1 got escorted back to the gate room along with SG-2 where they were given their equipment back.

Captain Wilson discussed the security arrangements with Dr Halsey and she agreed that the Spartans should be the escorts, it would take a Spartan fireteam just 20 minutes to arrive at the gate room on the planet meanwhile he also asked if one of the frigates that the Retaliation is carrying could make its way to the Earth in this universe's galaxy.

30 minutes later in the gate room

"Whoa look at those mechs the ones escorting the captain and the good dr." said O'Neill

"I don't think they are robots sir they are moving far too easily and the movement is natural not what you would expect from robots." said Samantha Carter

The Captain and Doctor came up to Colonel O'Neill

"Ready for your first trip through the stargate kids?" asked O'Neill as he keyed in a code in his wrist

"We are, by the way what was that you just typed in?" asked Captain Wilson

"We have an iris protecting our stargate and if we don't enter the correct code we could end up splattered up against it like bugs on a

wind shield." said O'Neill

"I see, alright I suppose it is we should get going." said Captain Wilson

SG-1 and SG-2 walked into the stargate and a moment later so did Captain Wilson and Dr Halsey along with a Spartan fireteam. The stargate then brought them to Earth.

* * *

><p>Sorry this chapter has taken so long but I have been swamped with work as well as trying to get this chapter right.<p>

I want to point a few things out first is the new class of ship. I believe that Cortana would get at least a ship named after her but I decided to give her a whole new class one which I think she has earned for helping the Chief out of difficult spots.

Second I am well aware some of you might be trying to figure out where I got the sentinel from as well as the forerunner shipyard, I will say this it will be revealed later on.

Thirdly the time for the new ship although it is bigger than any other ship they have attempted remember that they are no longer at war so they can devote more resources to building it. I have rewritten the ship specifications because after seeing some comments on how the sizes don't make sense then I have redone them. The Cortana class will be based on the new Forerunner fortress class vessels which are still superior to anything in the Stargate universe.

The last is revealing they are from a different universe, I put this part in because they would obviously find out eventually but I wanted to make it clear to them from the start.

I have no idea when the next chapter will come out but I will work on it when I have some free time.

I hope everyone had a good Christmas and I also wish Everyone a Very good New Year.

7. Chapter 6

Location: UNSC Earth (Secret Office of Naval Intelligence Facility)

>Date: 3rd November 2558
Time: 10:45

"Dr, status report on the patient?" asked an ONI Officer

"Well Sir, the patient is doing pretty well considering that they spent the last 5 years in a specially designed chamber but if all goes according to plan they should be up and about within the next week or so. I will say that it is remarkable that we were able to bring the person back after everything they went through." said the Dr in charge while looking at a few screen readings

"Dr, this patient was officially buried and given a military ceremony however before the person was laid to rest we detected a neural synaptic response but we still have no idea how they managed to

survive, so when the funeral was done we took the body and placed it in the specially designed chamber which you are looking after right now." said the ONI Officer (ONI has no rules over what they do)

"Do you think that the person will be co-operative when they wake up?" asked the Dr

"Well I doubt it because they have no doubt read the reports on what ONI has done so I would say that the person will be hostile, however despite all this ONI wants this person to be in charge of the new ship that is being built with Forerunner technology and they want this person to command it." said the ONI Officer

"What makes you think that they will obey the command?" asked the Dr

"Simple it will be a direct order from Lord Hood, he already knows that we are doing this and although reluctant he understands that this person will be a good choice and will follow orders just like everyone else in their family." said the ONI Officer

"Dr are we done here because I am meeting with Lord Hood in 1 hour over at HIGHCOM?" asked the ONI Officer

"Yes we are done here there is nothing further to report but I will keep you apprised if anything changes." said the Dr in charge

Location: Stargate Earth (Cheyenne Mountain Complex Stargate Command)

>Date: 25th April 1998
Time: 11:20

Captain Wilson and the Spartan Fireteam along with Dr Halsey were standing on Earth in another universe albeit in an underground military facility, SG-1 and SG-2 walked down the ramp with the marines in the gateroom a bit startled at the new arrivals but they didn't show it in their faces, they gave it away cause of body language.

General Hammond was at the bottom of the ramp waiting for SG-1 and 2 to get back.

"I take it the mission was a success?" asked General Hammond

"Well sir as you have probably guessed we brought back some company, awfully nice folks with lots of cool stuff." said Jack O'Neill

"Welcome to Earth, I'm General Hammond." said General Hammond

"It is an honour to be here General, I am Captain Wilson and this is Dr Halsey, behind us are my security escort." said Captain Wilson while saluting a superior officer and the Spartans then followed with a salute of their own

"Colonel would you take our guests to the infirmary and have them checked out by Dr Frasier and then afterwards we can talk with them." said General Hammond

"This way Captain." said Daniel Jackson

As the guests were walking down the ramp the general started to talk to them.

"I'm afraid that you will have to leave your weapons with us, this is a precautionary measure." said General Hammond

"I understand, we did the same to your two teams when they met us." said Captain Wilson

A couple of the marines stepped forward to relieve the travellers of their weapons the Captain handed them his weapon and the marine was surprised at the weight of it (not because it was heavy but because it was lighter than what he expected), The Dr informed them that she is a scientist and does not carry weapons, but when it came to the Spartans they initially hesitated before the Captain stepped in and assured the Spartans it was alright eventually they gave the marines their weapons.

They followed SG-1 and 2 through the base to the infirmary where Dr Frasier will examine them.

"So how deep underground are we?" asked Dr Halsey

"We are 28 floors underground however we can't discuss anything else about the facility due to security concerns and by the fact that we haven't gotten to know each other yet." said Major Carter

"I understand, we would do exactly the same, I am curious though if the rest of the world knows about the stargate?" asked Captain Wilson

"The US Air Force operates the stargate and the rest of the world doesn't know that it exists as it is classified above top secret." said Major Carter

"Well I hope we can discuss this further however if we were to make an alliance it would be with the whole planet not specifically for your government." said Captain Wilson

"We would love to continue talking however we have arrived at the o so lustrous infirmary." said Colonel O'Neill

"These must be our visitors from the planet which you went too." said Dr Frasier

"General Hammond wants you to check them over." said Major Carter

"Have a seat." said Dr Frasier motioning to the beds

Captain Wilson and Dr Halsey along with the Spartans stepped into the infirmary and Dr Frasier gave an odd look to the Spartans as she had never seen 4 people so tall. Captain Wilson then told Dr Frasier that the Spartans weighed 400kg in their armour and that the beds would not hold them so they remained standing.

"I will need a blood sample from all of you so as to make sure that you aren't carrying any contagions." said Dr Frasier

"I can assure you that we don't carry any contagions and the Spartans definitely don't, you see the armour they wear protect them from anything and are sealed to operate in a vacuum, we know that this is protocol and will follow it anyway." said Dr Halsey

"Well I am afraid that it is still protocol and I will need the Spartans to remove their armour." said Dr Frasier

"Removing the armour is not possible as we need specialized equipment which you don't have and the Spartans don't like removing the armour anyway, however the Spartans can take their helmets off so as you can get a blood sample from them." said Captain Wilson

For the next 10 minutes the nurses took the blood samples from Dr Halsey and Captain Wilson along with the 4 Spartans who were standing and only knelt down so as the nurses could reach them to get a blood sample.

"Well Doc do they check out?" asked Colonel O'Neill

"I detect no irregularities in their blood work so they can be released." said Dr Frasier

"Thank You Doctor." said Captain Wilson

After getting checked out SG-1 took Captain Wilson and Dr Halsey along with the Spartans to the briefing room to get debriefed, waiting for them was General Hammond.

"SG-1, Captain Wilson, Dr Halsey please have a seat." said General Hammond

"Thank you." so Captain Wilson and Dr Halsey took a seat but the Spartans remained standing. "I have to say General that I am looking forward to this debriefing and hopefully we can propose some kind of treaty between our people." said Captain Wilson

"I am pleased and my government is hoping the same." said General Hammond

"I am sorry did you say that it is your government that is looking forward to a treaty between us?" asked Captain Wilson

"Yes I did is there a problem?" asked General Hammond

"You see General they told us that they want to deal with the whole planet and not just the United States." said Major Carter

"I see." replied General Hammond

"Well unfortunately we handle all ties between our planet and your people and any technology we obtain would be used for defensive purposes only and we would never use the technology on the rest of our planet." said General Hammond

"As I said we will deal with the whole planet however in light of this new information I will have to discuss this with my people I hope you understand." said Captain Wilson

"Well I have been given information on what occurred when SG-1 and 2

went to your planet we had initially chosen that planet for a beta site, however with your arrival it seems that we will have to look for another planet to establish our beta site on." said General Hammond

"If you want you can establish a base on the planet that we are on along with us so that you won't have to look for another base." said Captain Wilson

"That's very kind of you." said General Hammond

"From what some of your people were saying and what we overheard was that you came here by a ship is it true?" asked Major Carter

"Yes it is, we got to the planet by our ship and when we arrived we observed you but we did not make contact as we had no idea who you were." said Captain Wilson

"I would love to see your ship, the only time we have been onboard a space ship was a goa'uld mothership." said Major Carter

"You have talked before about the goa'uld we would like to know more about it if you don't mind?" asked Captain Wilson

"The goa'uld empire which as far as we know encompasses the known galaxy has been around for about 5000 years, the empire is ruled by the system lords which are the most powerful goa'ulds with the most amount of ships." said Dr Jackson

"They have already attempted to destroy us, they had previously sent two ships to kill us but we managed to defeat them by gating to where we thought the attack was going to take place. We disobeyed direct orders not to gate to the planet but because we disobeyed the orders we saved the planet." said Major Carter

"I would like to know in more detail how you were able to accomplish this as the weapons we examined while you were with us are from the late 20th century and as far as I know Earth didn't have the capability back then to destroy alien ships." said Captain Wilson

"You are right, however we can discuss this at a further time." said Major Carter

"Of course, well thank you for informing us of this, I would also like to extend an invitation for SG-1 to come onboard my ship because if we are going to become allies then it is only fair." said Captain Wilson

"I would like to know more about your civilisation." said Dr Jackson

"We will be able to help you with that when we are aboard the ship and I suggest we leave right away as the longer that we spend here the more of a chance that they will send a ship to see why we haven't checked in." said Captain Wilson

"After we finish here then you will head back to the planet." said General Hammond

"Sir." said Colonel O'Neill

They finished the debriefing and then headed back down to the gateroom, Walter dialled the address for the UNSC planet and SG-1 along with their UNSC guests stepped through the stargate.

Location: Earth Australia [UNSC HIGHCOM Facility Bravo-6]
>Date: 3rd November 2558
Time: 11:45

"Gentlemen I am here today to tell you about the update on the anomaly which we have understood is actually a wormhole to another universe. I have been informed from one of our ships that Captain Wilson made contact with another race of humans in this universe and that he and Dr Halsey went to their homeworld to find out more about them." said the ONI Officer

"We have all read the report that the ship submitted and I think it would be a good idea for someone to act as a representative for us." said General Horton

"I advise that we also send in the materials and equipment to build some ODP's around the planet which they are currently occupying to protect it from any threat. Furthermore if we can talk to some of these humans' representatives then we could offer an alliance and we could probably learn a lot from them." said the ONI Officer

All the people at the meeting agreed and then they decided on who to send as a representative.

"I have come here to discuss the new ship which is being built on a Forerunner Shield World, it will take about 20 years, however I believe we can cut that time in half if we send more people, the shipyard has one Strato-Sentinel however further logs indicate that there are actually a lot more and that they have been deactivated so if we activate them then instead of just one ship we can have a fleet of Forerunner ships in the space of 10 years maybe less." said Lord Hood

"We have no idea what would happen if we activated all the sentinels for now I say we have only 4 sentinels activated that would reduce the time the ship needs to be built to about 5 years, from what we read these Strato-Sentinels strip mine planets to build Halo rings and other Forerunner technology." said Admiral Fujasaki

"I have also been told that the weapons and Slipspace drive along with power generation and shields will be built into the ship as it is being built, the hand weapons that the Forerunners use will also be on the ship too however I think it would be best if we also have some of our own weapons onboard just incase." said the ONI Officer

"If we activate all the sentinels and the processes are all automated then we could just leave the sentinels to strip mine planets and then send the material back to the shipyard to be made into ships. I would advise caution however as we have no idea if they would do as we programme or how complicated this programming would be." said the ONI Officer

"We would monitor the whole process and we could also have AI's there just in-case anything goes wrong." said Lord Hood

"All right the next thing we have to discuss is the Master Chief, do we have any idea where he has gone?" asked Lord Hood

"We have no idea but we think he is looking for Cortana as those 2 were inseparable, we all know that she perished when the nuke was detonated however the Master Chief probably believes that she can be found on some Forerunner installation." said the ONI Officer

"That is preposterous." said General Horton

"Perhaps so but I think that he has earned a little bit of lee way." said Lord Hood

"What of the Infinity and the absolute record?" asked Admiral Fujasaki

"We have given the Janus Key to the UNSC Nighthorse they will continue the Infinity's work because we are giving the Infinity a new mission, a couple of days ago we received news that the Spirit of Fire has been discovered behind enemy lines and that the Infinity is the only ship which can bring it home safely." said Lord Hood

The meeting carried on for another hour. After the hour Lord Hood went back to his quarter's while all the other people who took part went back to their own places.

Location: System [HD 188653 Twin]
>Date: 4th November 2558
Time: 09:00

The gate activated and the defence teams aimed their weapons at the incoming traveller, 3.4 seconds later Captain Wilson returned with Dr Halsey and the fireteam that was sent with them along with SG-1. Captain Wilson then motioned for them to stand down and then they walked down the ramp while the defence teams stood down. Captain Wilson then went up to one of the marines at the gate.

"Has there been any other activity from the gate since we stepped through?" asked Captain Wilson

"There hasn't been any activity sir." replied the marine

"Very well carry on." said Captain Wilson

"Yes Sir." said the marines

Leaving the building where the stargate was located they then walked across the courtyard to where a pelican was waiting. He addressed SG-1 after he stopped next to the pelican.

"We will be taking this pelican up to the ship, if some of you want to remain here then you are more than welcome, if you remain here then you can explore the rest of the base." said Captain Wilson

"I think we will all be going." said Colonel O'Neill

"Then strap yourselves in and I will fly us to the ship." said Captain Wilson

SG-1 along with Dr Halsey strapped themselves into the pelican seats

and waited for the Captain to begin lifting off. After lifting off the pelican went straight for the Retaliation and one of its bays. As it got nearer to the ship the Captain then informed the AI that the frigate that he wanted sent to Earth should be recalled if it was dispatched already however if it wasn't dispatched then it will remain where it is until told otherwise.

The pelican touched down on the bay deck and then lowered the ramp, SG-1 with Dr Halsey and the Captain then walked down and onto the deck.

"Welcome aboard the Retaliation there will be plenty of time to go over everything and any questions you have will be answered." said Captain Wilson

SG-1 looked around the bay and was surprised at the size of it along with the equipment that was in it.

"Oh My." said Colonel O'Neill looking at all the equipment and vehicles around the bay

"If you will please follow me I will take you to the recreational area where we can discuss all the questions you have." said Captain Wilson

"How big is this ship?" asked Captain Carter

"I believe I can answer this for you." replied Dr Halsey

"The Retaliation is the second Infinity class vessel it is 5694.2 metres long, 833.3 metres wide and 1041.2 metres high." answered Dr Halsey

"Wow that must have been a huge undertaking to construct something like this, I was wondering how long it took to build." said Captain Carter

"It was however it was necessary, and to answer your question about how long it took to build, it took 2 decades." answered Dr Halsey

"I can't imagine the amount of resources needed to build a ship like this and you also say that this is the second type of ship to be in the Infinity class?" asked Captain Carter

"Yes the first the Infinity was built at the same time as this ship and I helped with designing and building the ship. The resources we needed was a huge undertaking that is why the ships were built in secret." "The Infinity was deployed in 2553 in combat and then it was recommissioned in 2557 into an exploration ship however it can still hold its own." said Dr Halsey

"Here we are the onboard tram system is the only way to get to anywhere in the ship within a reasonable time." said Captain Wilson

SG-1 along with the Captain and the Dr got into the tram system as he inputted where they had to go. SG-1 took a seat and so did Dr Halsey.

"If you guys have built this then you must have some impressive

military equipment that would give the goa'uld a run for their money." said Colonel O'Neill

"We have faced enemies that wanted nothing more than to destroy us however we survived and rebuilt and we also never gave up, the military equipment you see in the bay is just a small part of what we have onboard and that is just one bay." said Captain Wilson

"If you don't mind our asking how many bays does this ship have?" asked Captain Carter

"The Infinity class has 275 Cat-1 primary bays, 140 Cat-2 secondary bays, 108 Cat-3 matÃ©riel deployment bays, and ten Cat-8 sub-vessel deployment bays along with 329 R1295 Launching System/M9407 SOEIVs and 124 B854 Jettison Bays/M8823 HEVs and includes 8,900 SKT-29 Class-8 Enclosed Heavy Lifeboats/Controlled and 12,750 RLT-85 Emergency Shuttlepods." Answered Dr Halsey

"That is a lot." said Colonel O'Neill as he whistled

"What is more impressive is the atrium where we are going to, it should take about 3 minutes to get too." said Captain Wilson

"You mean to tell me that a ship this size has a place to relax and unwind?" asked Colonel O'Neill looking a little startled

"Yes it was built in originally as part of the design and I can tell you that some parts of it are more beautiful than some natural parks on Earth." said Captain Wilson

"I should also introduce you to the AI that overlooks all the ship and helps out the crew whenever possible." said Captain Wilson

"You mean an artificial intelligence?" asked Captain Carter

"Yes most ships in the UNSC and most planets too have AI's overseeing the basic tasks and ensure the smooth running of daily tasks, however for ships they require a more sophisticated AI." said Captain Wilson

"What do you mean by more sophisticated?" asked Captain Carter

"We have 2 classes of AI, Dumb and Smart." answered Captain Wilson

"Dumb AI's can only do what their programming entails and nothing more, however unlike Smart AI's Dumb AI's do not go rampant and could theoretically live forever." said Dr Halsey

"Smart AI's only have a lifespan of 7 years before the break down into rampancy, however they can run entire ships and other important installations almost by themselves." said Dr Halsey

"Smart AI's are made from flash cloning a person's brain usually this person has donated their brain after they have died as doing this to a person who is still alive could have serious consequences such as destroying the brain. I can show you some of my research Captain Carter if you would like." said Dr Halsey

"That would be great I am sure that I will find it intriguing." said

Captain Carter

The tram stopped and the doors open and SG-1 along with the Captain and Dr Halsey stepped out.

"SG-1 welcome to the atrium this is a place for personnel to relax when not on duty." said Captain Wilson

SG-1 were in awe of what they were seeing trees and plants along with animals and rivers on a spaceship. The rest of the area was taken up by recreational areas such as a large open park area to sit down and talk to people as well as a running track.

"You don't see this every day." said Colonel O'Neill

"This is impressive." said Captain Carter

"Thank you." said Captain Wilson

"I have arranged for a meeting place to be setup near the waterfall, the meeting room at the waterfall is used for when we need to hold meetings in informal places." said Captain Wilson

"I would like to know more about your history and I am sure Sam would like to look through some of your scientific databases or possible some of your other databases to see if there is anything that she could improve upon." said Dr Jackson

"We can discuss this at the meeting room, please follow me." Said Captain Wilson

As SG-1 and the Captain along with Dr Halsey were making their way over to the meeting room a couple of people who were off duty looked at them. They crossed the bridge to get to the other side of the river. SG-1 were looking around the path which had bamboo trees along with oak and chestnut trees complete with wildlife such as birds and butterflies. They came to an open spot where they could see a waterfall pouring down.

The meeting room was just a bit further on past the wonderful plants and flowers. When they came to the entrance of the meeting room it was decorated in an elegant but simple wooden design and the doors were also made of wood.

"Welcome to the meeting room please come in." said Captain Wilson

Captain Wilson opened the door and SG-1 then entered the room.

* * *

><p>Sorry that I haven't updated in so long I have been extremely busy with assignments and work that I really haven't had a chance to write any new chapters or even upload them.<p>

I took the liberty to expand on the recreational areas aboard an Infinity class vessel since we weren't given much detail.

The topic about which power source is stronger a Naquadah one in Stargate or one from Halo will also be brought up in future

chapters.

8. Chapter 7

Location: UNSC Retaliation informal meeting room

>Date: 4th November 2558(UNSC)25th April 1998(Stargate)

>Time: 09:30<p>

In the middle of the meeting room was an oak table with 12 chairs around it, on the table was a jug of water with several empty glasses. SG-1 took their seats on one side and the Captain and Dr Halsey on the other side.

"This is nice." said O'Neill

"Thank you colonel, this room was recently redecorated because the old room didn't have the feel of a room where we could hold meetings in informal places." said Captain Wilson

"I believe you have something that you want to ask us colonel?" asked Captain Wilson

"Yes, Carter what was it again?" asked O'Neill

"We would be interested in forming an alliance" said Captain Carter

"Well we would have to talk to our superiors, however I believe that we have a great deal to learn from each other for instance you could learn how to build a vessel for travelling interstellar distances, we could learn what the differences are between our 2 Earth's and more about the Stargate." said Captain Wilson

"I am more concerned about the threat of the goa'uld is there anything more you can tell us about the goa'uld, for instance how many there are or what types of ships they have along with their ground force. I would also like to know more about the stargate because earlier we had predicted its weight at 66 tonnes however it has since been rechecked and come out at roughly 29 tonnes. I would like your help in setting up a dial-up computer because in our efforts to move what you call the DHD to where we setup the base we accidentally broke the DHD and are unable to fix it." said Dr Halsey

"I would gladly help you but it took us 15 years and 3 super computers just to make the system work." said Captain Carter

"We should be able to do it faster as you have already done the work and got all the details worked out and we have more advanced technology." said Captain Wilson

"Sweet so we could build ships like this?" asked O'Neill

"In time yes but for now we would start off by teaching you about building the ships that we started out with and we would help you build a Prowler class ship which is the smallest type of ship we have military wise, our civilian ships are smaller, the Prowler is 160 metres in length." said Captain Wilson

"Why don't you just give us the plans for say this kick ass ship?" asked O'Neill

"For your level of development and the fact that you don't have the resources to build a ship like this, it is more appropriate to start you off at this level and it will take you about 2 years to fully build and test the ship with our assistance, however you will need to get your engineers to talk with our engineers so as you have a better idea how hard it is to build one." said Captain Wilson

"I think if I were to look at the specification maybe I could suggest some improvements that maybe you haven't thought of." said Captain Carter

"I would be glad to share the specifications of the ship with you however these ships were designed when we were just beginning to explore other systems outside our own so you could perhaps come up with some things differently." said Captain Wilson

"I want you to understand that these are plans which are property of the UNSC and that you can borrow the plans but they must be returned to us if we ask for them back, if we agree to help you that you must inform your planet of the stargate because we will not give your government overwhelming superiority against other nations." said Captain Wilson

"We understand all that and will be happy to agree to that part of the agreement." said Doctor Jackson

"On the account of the other stipulation, we have been over this the US government handles all matters dealing with the Stargate." said Captain Carter

"I understand but you should know that if the other nations found out without you telling them then your planet might fall into war at which point those ships might just look like the best bet to end the war for your government." said Captain Wilson

"I won't pretend that this is very complicated but you must see it from our point of view, we believe that our world is not ready to learn about the Stargate." said Daniel

"For a long time we thought the same about the Covenant but eventually the public found out and we had to come clean, it was the only thing that kept us together, a threat from aliens does help to bring everyone together." said Captain Wilson

"You said earlier on that this ship was built because it was necessary I am assuming it has something to do with this Covenant?" asked Captain Carter

"You are correct I shall start at the beginning keeping it short, a full account of the battles will be in the ship's database should you want a copy please don't be afraid to ask." said Captain Wilson

"In 2525 at the Planet Harvest we encountered at the time a previously unknown collective of alien races the only words that were spoken were 'Your destruction is the will of the Gods... and we are their instrument', now at the time we didn't know what they meant but as time went on we found out who their gods were.

In 2526 we attacked a covenant super-destroyer with Battle Group X-Ray led by the legendary Vice Admiral Preston J Cole and a 40 strong group of ships however we lost 2/3 of the fleet, after that the battle for the planet began. From 2526-2531, 5 long years and we finally took the planet back from the Covenant after many losses including ships and soldiers.

Skip ahead 2 decades and by this time the Covenant had pushed us back to a few inner colonies and our extinction was almost certain we only had a few key worlds despite our best interests we feared the worst that we would be extinct by the end of 2552.

On July 25th 2552 the Covenant found Reach the second most protected planet and the planet that had the most military forces on it, the Covenant attacked it by sending in a strike force to take down our comms then send in their fleet to finish us off we lasted for a full month and 5 days. The Covenant sent 750 ships to glass it we managed to destroy most of them but we lost all but 1 ship and in the end Reach was glassed.

After Reach fell we pulled all our forces back to Earth deciding that should the Covenant find it then we would fight until we are all dead and if we were to go to hell then the Covenant would be coming with us.

"Nice, sorry" said O'Neill interrupting.

In 2552 in October the Covenant arrived at Earth where we held them off until December 2552 where the final battle of the war would be fought by the warrior caste of the Covenant standing side by side with us as they discovered their leader's lies and that everything they had been told was a lie.

In March 2553 the war would officially be over even though the population had been reduced to only 200 million we didn't go extinct and ever since then we have been rebuilding just in case the Covenant decides to form up again and attack us however since their schism it is unlikely as they will be too busy fighting between themselves. We think that there are other colonies that the covenant didn't glass or destroy but until we go to those colonies then we won't know.

You now know a brief history of what we have been through so basically we have been fighting for 28 years in a war against an alien species and we are just now started to reclaim everything we have lost." said Captain Wilson

"Wow you have been through some crazy times." said O'Neill

"Wow that is unbelievable I never would have thought something like that could occur especially not in the way you describe it, is it possible to say how many planets you had and how you managed to stop the Covenant from finding Earth?" asked Captain Carter

"We had 800 colonies on several planets throughout our space and the protocol we used was known as the Cole Protocol it basically said that no ship could lead the Covenant to Earth or any other populated human world and that if you are going to be captured then you will wipe all data from the ship and self-destruct to ensure nothing remains but that protocol became ineffective when the Covenant found

Earth however we still used it because there were colonies that the Covenant haven't found but if these goa'uld are as dangerous as you say they are it may be helpful to have something like the Cole Protocol when dealing with them." said Dr Halsey

"If we start to build ships to fight them then it may be a good idea for something like the Cole Protocol to be put into effect that way the goa'uld won't know that we are attacking them." said Captain Carter

"What was the name of the group that broke off from the Covenant when they found out they were lied too?" asked Dr Jackson

"The official name for their race is the Sanghelli however most in the UNSC just call them elites as that is a lot easier to saying when you are fighting." said Captain Wilson

"Who were the gods that these Covenant worshipped?" asked Dr Jackson

"The gods they worshipped were called the Forerunners however they aren't really gods they are just a lot more advanced than we are." said Dr Halsey

"If the Covenant who were more advanced than you were worshipping them as Gods why did they not know that they were just more advanced?" asked Teal'c

"We are not sure why the Covenant couldn't see it but I suspect they knew and didn't care or that the prophets the ones who led the covenant didn't want them to know." said Captain Wilson

"You have said before what the goa'uld are but why do the other worlds you have visited worship them as gods surely if they can trade with other planets they should see them as technologically more advanced and not gods?" asked Dr Halsey

"It is as you said they are just technologically more advanced so the more primitive civilisations in this galaxy seem to think that they are godly but even the other civilisations that trade with different planets can be primitive." said Captain Carter

"I would like to hear some more about this legendary Vice Admiral Cole you talked about?" asked Colonel O'Neill

"He was just like any other member of the UNSC and he was dedicated however after his last battle we never recovered a body so he is either still alive or he is dead." said Captain Wilson

"His last stand battle is legendary he sent his fleet away from the battle after the first attack, The first attack consisted of a Covenant fleet of 300 hundred ships with another 200 coming in for the second and Cole faced the second fleet with only his ship, I admit to do what he did takes courage and guts, so his flagship versus about 500 of the Covenant's, in every battle he fought with the Covenant he never once lost and his battle record is without equal.

The last stand is heroic, a fleet of 162 UNSC ships engaged 300 Covenant ships and destroyed them. He got his fleet to attack the

enemy fleet by splitting up and attacking by 2 sides of the planet the covenant then split their forces up and he got his fleet back together and attacked the separate covenant fleet with two thirds of the enemy fleet destroyed the covenant regrouped and it was at that moment that an insurrectionist fleet came in and destroyed the rest of the fleet after they did they then disappeared. It was at this point that another 200 covenant ships came in so he instructed the rest of the fleet to leave and had his flagship speed to the gas giant and powered down all non-essential systems and opened all missile silo doors and then sent 1 transmission on an open-com to the covenant fleet openly mocking them and their religious superiority.

_Listen to me, Covenant. I am Vice Admiral Preston J. Cole commanding the human flagship, __Everest. You claim to be the holy and glorious inheritors of the universe? I spit on your so-called holiness. You dare judge us unfit? After I have personally sent more than three hundred of your vainglorious ships to hell? After kicking your collective butts off Harvest - not once - but twice? From where I sit, we are the __worthy inheritors__. __You think otherwise, you can come and try to prove me wrong.__

The covenant ignored the rest of the fleet and went for his ship and he plunged into the gravitational pull of the gas giant and the covenant fired but the magnetosphere provided enough interference against the plasma weapons that the covenant used that he survived and he taunted the covenant one last time.

Is that the best you can do? Watch what one unworthy human can do!

After that transmission he fired everything he had into the gas giant and it underwent spontaneous nuclear fusion and exploded into a brown dwarf, when the micronova ceased every covenant ship was destroyed along with Cole's ship although later on other members in the UNSC, A.I's in particular analysed and speculated that he initiated a slipspace jump and escaped to retire somewhere to live out his dream of farming. Whatever happened losing him was a great loss for the UNSC." said Captain Wilson

"Wow I am loving his style." said Colonel O'Neill

"So many ships for one battle and so much death too." said Doctor Daniel

"Never before have I heard of that many ships being massed for any reason." said Teal'c

"Who were the insurrectionists?" asked Captain Carter

"They were rebels who didn't like the UNSC and kept fighting with us even when the covenant showed up but as the covenant kept pushing us further back into our inner colonies most of the rebel groups ceased and worked with us to prevent our extinction as a species because they wanted to survive the relentless onslaught that the covenant was presenting. When the covenant came they were at first unaware of how strong they were but when the covenant had pushed us back the rebels realised that their goal was to wipe our species out and that fighting would only ensure that it happens quicker they decided on calling a ceasefire to work on survival." Said Captain Wilson

"So you were fighting insurrectionists while also fighting the covenant?" asked Daniel

"We actually were fighting them before the Covenant came, the reasons for the fighting are difficult to explain but the basic premise is that they weren't happy with the way that the UEG or United Earth Government was handling matters within the colonies." said Captain Wilson

"However we are kind of getting off topic here, I thought you asked us to form an alliance?" asked Captain Wilson

"We did but most of the alliances we have forged through the year the Stargate program has been active hasn't really paid off for us, we met a people called the Tollan and they had superior technology to us with the ability to walk through solid walls and when we asked they said that we were to primitive. I would like to know if you will treat us the same way?" asked Captain Carter

"That is very interesting a civilisation able to make technology to walk through walls, however in response to your question no we won't however advancing your planet too quickly could result in disaster." said Dr Halsey

"If you inform your planet it might bring the planet together and if it does then you will have the resources of a planet behind you rather than just a single government." said Captain Wilson

"To start off with though you could help us set up facilities here on this planet this would allow you to see how we build certain technologies although most of it is based on your factories already. I would also like invite some of your engineers to view the plans of our old Prowler class vessels however we would need to educate your people quite a lot before you could actually build it along with the FTL drive." said Captain Wilson

"We would also like to help you by going on joint operations against the goa'uld just to see how much of a threat they are." said Captain Wilson

A knock at the door interrupted the conversation.

"Sir sorry to interrupt we have a situation an unknown ship has just appeared in the system and is heading straight for the planet we have no idea but by its size we think it might be some type of transport ship as we have only registered 2 people onboard." said the Spartan Commander

"Have you got an image of this ship?" asked Captain Wilson

The Spartan Commander handed the pad to Captain Wilson and he took it and looked at the ship and then passed it to Dr Halsey who looked at it who then passed it to SG-1.

"This is a goa'uld cargo ship used for transporting cargo and it can be used as a scout ship as well." answered Teal'c

"So does it have any weapons?" asked Captain Wilson

"It does not." said Teal'c

"Well if it was a goa'uld then I suppose it could be a scout however if it is not a goa'uld scout then who could be piloting it?" asked Captain Wilson

"I do not know." said Teal'c

"Has there been any transmission from the ship?" asked Captain Wilson

"There has not been any but that could mean that they just don't want to answer our communications or that their communication systems are damaged." said The Spartan Commander

"I would like you to disable and board the cargo vessel and find out who is on that ship." said Captain Wilson

"Understood." said the Spartan Commander

"SG-1 if it is not too much of a hassle I would also like you to help as you have been studying this technology for a year." said Captain Wilson

"We would like to help you study the cargo vessel if we are to be allies." said Captain Carter

"That is acceptable we have no experience studying goa'uld vessels or their language while you have but we have a secret up our sleeves that will make this endeavour easier we call them engineers, they are not your normal engineers but biologically engineered super computers which can take apart and put back together any technology and improve upon it in seconds, we gave it a data pad once and it would take it apart and assemble it into 100 different parts and put it back together within 10 seconds with everything improved even though it was the first time that it had seen one." said Captain Wilson

"Wow I would love the chance to meet them, I would like to know who designed them." said Captain Carter

"Who designed them doesn't matter however they have become incredibly useful and have improved many systems aboard the ship which may have taken years to do by ourselves." said Dr Halsey

"Well if that is all the negotiating then we can go down to the hangar bay and await the cargo ship." said Captain Wilson

They left the room with SG-1 behind them and headed for the tram system. Eva informed the captain that the cargo ship would be brought to hangar bay number 47 as that still has some Mantis's and Scorpion's in it that are fully loaded and that they could destroy the ship should it be necessary.

The cargo ship is approaching the UNSC frigates, the Spartan Commander then informs the captain of the frigates that they have to disable the ship.

"I want that ship disabled, do we know how to disable it as it is a design that I am not familiar with?" asked the captain of the frigate to his officer that was monitoring the ship.

"I have no idea how to disable it but may I suggest that we try and capture it in the bay that way we can board it without having to fire on it." said the sensor officer

"I am not having that ship board any of our ships without knowing more about it." said the frigate captain

"Sir I have taken some more scans and it appears that the ship is badly damaged we couldn't see it earlier because that ship is made up of a different material so I just assumed that the damage may have been from bad construction however after analysing the pattern I am reading energy weapon damage it is possible that the ship had shields and then managed to escape but not before it was hit." said the sensor operator

"If that ship is damaged then we may be able to lock onto the ship and clamp it in place and then board it, move the ship to the side of them and then clamp." said the frigate captain

The frigate started to manoeuvre to the side of the cargo ship, when the frigate was directly at the side of the vessel it opened its hangar door and very carefully encompassed the cargo ship however because the cargo ship was moving they had to match it before they could close the hangar door on it. Once they got the cargo vessel in the hangar bay they used clamps that were used to hold Pelicans and fighters to attach to the cargo vessel.

"Sir Hangar bay reports that that the ship is now in and clamped we should inform Captain Wilson that we have the ship or do you want to board it before we get to the Retaliation." said the comm officer

"Inform Captain Wilson that we have the ship and will bring it to the Retaliation, I want the ship watched and I also want to know if anyone tries to get out of it." said Captain of the frigate

"Understood Sir." said the comm officer

"Security units 1 through 5 to the Port Hangar Bay set up defensive positions and anything that tries to escape from the ship stun them and then restrain them." said the frigate captain

In the Port Hangar bay the cargo ship was clamped and you could see barricades being set up so that anyone who left the cargo ship would be shot. Marines put tranquilizer darts in their weapons so that if the people who were in the ship left it they wouldn't be killed. After the barricades were set up they waited.

The UNSC frigate approached the Retaliation.

"Captain we are approaching the Retaliation I suggest that we put our Port Hangar towards their Hangar bay that way the cargo ship can't escape even if they tried." said the comm officer

"Very well inform Captain Wilson what we intend to do and get ready to release the clamps as soon as we are next to the Hangar bay." said the Captain of the frigate

The UNSC frigate manoeuvred to starboard hangar bay number 47. Outside the hangar bay there were 2 mantis's and 2 scorpion tanks ready for the cargo ship to come into the bay. Marine and Spartan IV's took up position and waited for the cargo ship to be released from the frigate.

Captain Wilson along with Dr Halsey and SG-1 were walking down the corridor to hangar bay 47.

"The frigate has docked at the side and I have security teams on standby, when I tell the frigate captain to let the clamps go then the hangar bay of the frigate will be open and the only place the cargo ship can go is into hangar bay 47 which we are standing outside." said Captain Wilson

"See now why can't we just have the plans for one of these ships, I mean we could kick the goa'ulds asses if we had one of these bad boys." said Colonel O'Neill

"Sir, if we were to get the plans for this ship it would take us decades to build it probably even longer than the 2 decades it took the UNSC to build." said Captain Carter

"Wow that is quite a sight." said Daniel staring out at the hangar bay

"Now that's what I call overkill." said O'Neill as he saw the Mantis's and Scorpion's

"Sir all the security precautions are in place and the frigate captain is ready to release control of the ship to us." said EVA

"Very well tell him he can release the clamps and open the hangar bay door." said Captain Wilson

"Aye Sir." said EVA

The UNSC frigate lowered the hangar bay door shield and the cargo ship then left the frigate which stayed in place so it could escape out of the Retaliation bay's hangar. The pilots in the cargo ship so no other option than to place the ship down on the ground where it was surrounded by troops and other things that the pilots couldn't describe.

"Sir the hangar bay reports that the cargo ship has powered down, I suppose they saw no other options." said EVA

"So shall we greet these pilots because I am pretty sure that they wouldn't want us to start shooting their badly damaged ship." said Captain Wilson

"You know something is bound to go wrong it always does." said O'Neill

"Well I don't think the pilots will prove to be a challenge not with all the weapons we have." said Captain Wilson

"Well I can't wait to see something go wrong." said O'Neill

They made their way to the cargo ship and on the way they also ran into a few Huragoks.

"Are those the engineers that you refer to?" asked Captain Carter

"Yes they are probably curious about the ship which is going to be a boon because they will probably have that ship repaired within minutes or hours." answered Captain Wilson

"I will take a dozen of them along with some of these kick ass walking robots." said O'Neill referring to the Mantis's

"Well the engineers aren't leaving the ship as they are few in number and the Mantis's well we can come to an arrangement later perhaps when we sit down and sign a more formal agreement unfortunately you will just have to observe them." said Captain Wilson

They approached the cargo ship with an escort but before they could reach the barricade that was set up around the ship the doors on the cargo ship opened and out stepped 2 people.

* * *

><p>I am sorry for not updating sooner but I have had a bit of writer's block and also I keep rewriting this because it didn't make sense however I am pleased with how this chapter turned out.<p>

I don't know when I will be getting the next chapter out but I will try my best to get it out before the end of August.

As always you can leave a review if you like and you can also like and favourite too if you want.

9. Chapter 8

Location: UNSC Earth (Secret Office of Naval Intelligence Facility)

>Date: 4th November 2558
Time: 10:45

"Dr what is the status of the patient?" asked the ONI Officer

"Well Sir, the patient is ready to begin walking around, should I bring her out of the chamber?" asked the Dr

"I think she has had long enough, for 5 years she has been stuck in that chamber and is lucky to be alive." said the ONI Officer

"Bringing her out now." said the Dr tapping on the machine controls

The chamber stopped functioning and the patient was gently put onto a bed and covered up and then was attached with various instruments needed to monitor her. The doctor then said it would take a while before she was up and walking about.

5 minutes later they could begin to hear groaning and mumbling and were surprised that after 5 years that the patient would be conscious

within such a short time.

"Welcome back." the Dr said looking at the patient

"What was the last thing you remember?" asked the ONI Officer to the patient

"It may take her some time before she can talk." said the Dr

"I can hear you speak." said the patient

Both the ONI Officer and doctor were stunned because they thought it would take longer for her to be able to speak.

"Can you remember anything?" asked the ONI Officer again

"I can remember my name and a few other things." said the patient

"Alright could you start with who you are, we know who you are but we have to be sure that you can remember by yourself as that helps you a lot." said the Doctor

"My name is Miranda Keyes and I am a Commander in the UNSC Navy." said Commander Keyes

"Good, do you remember anything else?" asked the ONI Officer

"I do, but I think that we should continue this discussion when I am dressed and have eaten." said Commander Keyes who didn't look like she was amused

"I understand you will have 30 minutes to get washed, dressed and eat, then we will see what you remember." said the ONI Officer

>Time: 10:00<p>

The pilots of the cargo ship were surprised that they had managed to get away from the pursuers and thought that they wouldn't be able to make it to the nearest Chappa'ai. They were surprised again when they got caught by a ship that they could not recognise. The pilots then decided to land and shut down all the power and walk out as there was no-where left to go.

After walking out of the ship one of the pilots took a good look around and were again surprised because they had not seen anything like this ship, however they did not get the chance to look around any further because they were surrounded by things they could not describe.

Further away from the ship was SG-1 and Captain Wilson who were at the moment observing them from behind the barricade that was setup.

"Do you recognise them?" asked the Captain to SG-1

"Nope, I don't recognise them, then again I have a hard time

recognising anyone." said O'Neill

"I also do not recognise them either." said Teal'c

The other members of SG-1 also replied they did not know them.

"Identify yourselves." said Captain Wilson to the 2 pilots

The two pilots of the ship looked at the man before answering.

"I am Kelleck." said Kelleck

"I am Heshur." said Heshur

"Are you goa'uld?" asked Captain Wilson with suspicion

Location: Earth Whitehouse Oval Office (Stargate Universe)

>Date: 25th April 1998
Time: 13:00

"Mr President, General Hammond is on the phone." said the secretary

"Thank you." said The President to his secretary

The President picked up the phone and talked to General Hammond

"I hope you have good news for me George." said The President

"I do indeed Sir, SG-1 has made contact with potential allies and those allies have invited them back to their world." said Hammond

"That is good news indeed, so who are these potential allies?" asked the President

"From the meeting, we know they are called the UNSC and according to them they are from another universe, I know it sounds crazy but it is the truth, however I think we should proceed with caution until we are sure they are from another universe." said Hammond

"Do we know anything more about them?" asked the President intrigued and wanting to know more

"What we do know is that they have a ship, and they had no idea what a Stargate was or what a Goa'uld was." replied Hammond

"I see, how would they take to an alliance with us?" asked the President with some interest

"I asked the same question and apparently they want to deal with the whole planet, if we are to make an alliance they want us to reveal to the world the stargate which could cause a lot of problems but that is so far the only stipulation they have." said Hammond

"Well I don't think we can agree to that due to the fact that the world may go to war if they found out about the Stargate." said the President

"The Captain I talked too seems to understand that and said that they

would help when the time comes, they said in exchange to revealing the stargate to the world they would help us build ships." said Hammond

"I will take what you said under advisement however if you get the opportunity to talk to this Captain again would you ask him what types of ships he would be willing to show us how to build and what type of help he would be willing to provide." said the President

"I will Sir, but what do you think about us revealing the Stargate program to the general public?" asked General Hammond

"Well I have to give it a lot of thought but if us gaining an ally that can teach us to build space ships and has a formidable army with a lot of new technology is the price we must pay to help us defend against the goa'uld then I must seriously consider this." said the President

The phone conversation went on for a while but by the end of it the President had authorised General Hammond to write up a proposal for the UNSC to take back to their leader or leaders.

Location: Earth Stargate Command (Stargate Universe)
>Date: 25th April 1998
Time: 13:30

General Hammond had just finished talking with the President. "What way will I write this proposal up?" thought General Hammond, sure writing a proposal so that they could propose an alliance may be easy but when it came down to it there were so many considerations to take into place and he thought this is going to be very hard indeed.

General Hammond walked out of his office and towards the stairs to go down to the Operation room for the Stargate. On his way down the military personal saluted him and he saluted back and the scientists also gave him a nod of respect. Upon getting to the Operation Room he talked to the technician.

"Sergeant when is SG-1 scheduled to be back from the planet?" asked General Hammond to Walter

"Sir, SG-1 has an estimated time of arrival at 14:00 hours." replied Walter

"Thank you sergeant." said General Hammond as he was deep in thought on the way back to his office

>Date 4th November 255825th April 1998
>Time: 10:00<p>

Right after the two people introduced themselves they did indeed state that they were carrying symbiotes inside of them and that was when they were secured by the marines and taken to the medical bay.

"What is this ship I haven't seen anything like it and it doesn't match any goa'uld design I have seen before?" asked Heshur

"I am sorry but that is classified information and since you were in

a goa'uld ship and you have symbiotes with you then you will be checked out by medical and then confined." said one of the marines

"Do you think we are goa'uld?" asked Kelleck

"I don't know what to think but you have symbiotes in you and until you are cleared by our medical staff and that you pose no danger to the crew you will be confined to quarters. I will try to make you as comfortable as possible but anywhere you want to go on the ship and you will be escorted by 4 marines." said Captain Wilson

"We understand, however we must also caution you that we won't take kindly to being escorted everywhere or being held prisoner for long." said Heshur

"After medical has cleared you, you will be brought to a meeting room for questioning so you can explain exactly what you were doing by coming into this system." said Captain Wilson

The 2 hosts nodded and understood and left with the security escort to the medical bay. O'Neill asked

"Is it wise to let them wander around the ship?" asked O'Neill

"I would not worry colonel we are more equipped to deal with the situation than you know." replied the Captain

"I would like to examine the inside of the cargo ship if you don't mind captain." said Captain Carter

"I am afraid that will have to wait for the moment Captain Carter as we still have much more to discuss." said Captain Wilson as he started to walk off followed by Dr Halsey back to the tram system which SG-1 followed them too.

Once inside the tram system the Captain pressed the button for the relaxation area on board the ship so he could continue the discussion in the room that they were in before the cargo ship showed up. The tram then left for the relaxation area.

>Date: 4th November 2558
Time: 11:20

Commander Keyes after having gotten dressed and had a good meal was then brought before the ONI Officer in the room where she would be questioned about what she remembers.

Commander Keyes looks around at the room and finds that it is quite nice. The interior is just like a home in that it has a clock in the corner, the desk is made of wood, there is a screen for the computer on the desk, there is a fish tank sitting next to the opposite wall from the clock and finally there are 2 chairs 1 behind the desk and the other in front of the desk.

"Commander Keyes, please come in and sit down." said the ONI Officer

"Thank you very much." said Commander Keyes

"I hope you have had time to get used to walking again as well as eating, sadly I have had a lot of paper work so was unable to talk to you before now." said the ONI Officer

"I understand, I am curious though to what the exact date is?" asked Commander Keyes

"This may be a shock to you since the last date you remember was December 2552, is that correct?" asked the ONI Officer

"I remember it being December in 2552 yes but the date was the 11th, which was the day I was shot in the back and I remember nothing after that." answered Commander Keyes

"I will bring you up to speed then, the current date is 4th November 2558, and a lot has happened since 2552, I will start by saying that the Human-Covenant War is over, it ended in March of 2553, there was a nice little ceremony over the by the hillside near the Voi portal that will remain barren as a memorial.

You will be pleased to know that the Sangheili whom you fought alongside in 2552 have helped us on many occasions and we have aided the Arbiter when he requested help.

In 2553 the Arbiter returned home and discovered that since the Covenant fractured more factions have rose up under the guise of the true covenant and those leaders all cement their claim by saying that theirs is the only true Covenant which has led to many disputes between different factions.

The Sangheili Civil war raged between 2553 and 2558, The Arbiter led one of the biggest factions in the Civil War and he also requested help from the UNSC when he was in danger of being defeated which we gladly give him.

In 2557 we found the Forward Unto Dawn floating near a Forerunner Shield World called Requiem while investigating the Dawn's distress Beacon, during the UNSC Infinity's investigation of a strange signal they were pulled into Requiem but managed to escape where the then Captain Del Rio left a beacon near Requiem and came back to Earth to warn us about the Didact, leaving the Master Chief on Requiem which was a decision that was not popular with HIGHCOM and so Del Rio was retired and the commander at the time was put in charge of Infinity.

On July 24th, 2 days after the warning, the Didact arrived at Earth and his ship was able to withstand our Orbital Defense Platforms and our entire Defense Fleet, his ship was only taken out thanks to the combined efforts of the UNSC Infinity, the Master Chief and Cortana.

Between 2552 and now we have had to deal with a lot of different threats. I will give you a file which will contain all the relevant information to get you up-to-date. I would like to ask you if you would like to continue in the Navy as you have effectively been declared dead as of December 2552." said the ONI Officer as he finished talking

"I had thought about retirement however I am still part of the Navy

so I will take my old post up although I will need to train and read up on all the material because I have been out of the field for 5 years." said Commander Keyes

"I had a thought that you would like to continue which is why I put in a request to the head of ONI which was taken directly to Lord Hood and he will be on his way to HIGHCOM tomorrow which you will also be there too, in the meantime I suggest you read the file it will bring you up to speed on what you have missed going into more detail than I could go into." said the ONI Officer

"Thank You, I will read this after I go through all the tests." said Commander Keyes

"I will see you tomorrow at 09:30, Good day Commander Keyes and good luck with all the tests." said the ONI Officer

Location: System [HD 188653 Twin] Onboard the Retaliation
>Date 4th November 2558 25th April 1998
>Time: 10:30<p>

The tram arrived at the relaxation area and Captain Wilson, Dr Halsey along with SG-1 got out and walked back to the meeting room. They got to the meeting room and opened the doors and sat down.

"I think we should continue discussing what we talking about before this incident began don't you agree?" he directed the question to SG-1

"I agree and personally hope that we can come to an arrangement that would benefit both of us but we understand if you need to talk with your superiors because that is no doubt what the good General is doing now." replied Colonel O'Neill

"We were discussing the possibility of an alliance between the two of our people's." said Dr Jackson

"I will read the proposal that anyone from your government submits, however I will then pass along a copy to HIGHCOM and to the UEG senate and let them decide if we should proceed. I would need to see if we can't run a few missions together to get a better grasp of the danger of these Goa'uld." said Captain Wilson

"The Goa'uld, from our experience tends to send in massive armies to subdue any foe, on many different occasions including the very first mission to a Goa'uld homeworld which was what lead Teal'c to join us. We have gained much more information on the Goa'uld since Teal'c has joined us." said Colonel O'Neill

"In the interests of co-operation perhaps we can assault a Goa'uld base or somewhere that is of little consequence to the Goa'uld but could hold technology that they use?" asked Captain Wilson

"That would be a bad idea because if the Goa'uld discover that you attacked them and they found out where you operate from then they would come to subdue you, on the other hand they may suspect us and Earth would be attacked. I would suggest that we find out all we know from the 2 prisoners that just came aboard and are being checked up on by your medical staff." said Captain Carter

"Good idea, EVA give me a status update on the 2 Goa'uld that we took prisoner." asked Captain Wilson

"The 2 prisoners have completed the medical portion and are now underway to their confinement, shall I have the guard detail bring them here instead?" asked EVA

"Yes, have them brought here and make sure that you blindfold them because I don't want them to be able to tell where in the ship they are." replied Captain Wilson

"Understood" said EVA.

Location: UNSC Earth, (Secret Office of Naval Intelligence Facility)

>Date: 4th November 2558
Time: 11:00

The ONI Officer contacted the head of ONI and requested that Lord Hood and the rest of HIGHCOM be brought up to speed on the re-instatement of Commander Miranda Keyes but promote her to Captain due to her record and the fact that she saved Johnson from the Prophet of Truth.

The ONI Officer contacted Admiral Osman directly and started to talk to her.

"Admiral Osman, I would like to inform you that Commander Keyes is up and is currently completing the tests that need to be completed before she can be back in the field. It is my recommendation that she be promoted to Captain so that she can take up her new post as Head of the Cortana Class ship currently being constructed. I have given her a more detailed version of the events after the war leaving out any parts that paint us in a bad light." ONI Officer

"I will make your recommendation to the rest of HIGHCOM." Admiral Osman replied

"Thank you Admiral, on another note how do you think this wormhole to another universe will benefit us because we have yet to receive a report, for all we know this new universe could be a lot more dangerous than the one we are living in." ONI Officer

"This new universe presents us with new opportunities. I would like to take full advantage of it, when we regain communication with the other side since at the moment we can't communicate because the wormhole is destabilising any signals needed for communication, the probe's signal was able to get through because it was on a low frequency which is too hard for video transmissions to use." Admiral Osman replied

"If I have any more news I shall contact you, I would also like to know who will inform Commander Keyes of her promotion and who will also tell her of her new assignment?" asked the ONI Officer

"That is being taken care of as we speak, as for who informs her of her new assignment, that will be discussed when she meets with HIGHCOM." Admiral Osman replied

The communication channel then ended with the ONI Officer left wondering if he said something he wasn't supposed to because the

Admiral looked annoyed at the last from of questioning.

* * *

><p>Sorry for the Long Long Long Wait but quite a few things have happened that has set the story back and this chapter isn't as long as I wanted it to be but I have been busy.<p>

First thing is first though, Since the news of Halo Wars 2 was unexpected, I will be re-writing the story to have the Spirit of Fire show up in the Halo Universe, Escalation we finally saw the Absolute Record and as time goes on and more of it is revealed through escalation I will add more of it to this story.

I have 1 more announcement, I am adding another Character to this story from another Franchise and it is a franchise I enjoy playing, don't worry as it is all planned out and can easily fit seamlessly into place. I will leave you guessing as to the character, the first person to guess correctly can then submit their own character that will be used in the sequel to this Halo/SG-1 crossover which will be Atlantis.

I also want to ask you if you want me to skip ahead like months for the date because if I wrote out what happened everyday this story would be longer than any other and would probably come to over 700 chapters. For the important parts like the treaty signing or any other important battle then it would be done in days and not skip, but I really don't want to write 700 odd chapters because that would take too long.

I was planning on having the Spirit of Fire show up in the Stargate universe but since the announcement of Halo Wars 2 that has went out the window and will now show up in the Halo Universe.

Thank You everyone for your infinite patience and as always if you like this story you can leave a comment/message and follow as well as favourite.
